Warranty

THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS GUIDE ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS GUIDE ARE BELIEVED TO BE ACCURATE AND PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF PRODUCTS.

YEALINK NETWORK TECHNOLOGY CO., LTD. MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THIS GUIDE, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Yealink Network Technology CO., LTD. shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

Declaration of Conformity

Hereby, Yealink Network Technology CO., LTD. declares that this phone is in conformity with the essential requirements and other relevant provisions of the CE, FCC.

CE Mark Warning

This device is marked with the CE mark in compliance with EC Directives 2006/95/EC and 2004/108/EC.

Part 15 FCC Rules

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

**Class B Digital Device or Peripheral**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

**WEEE Warning**

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such WEEE separately.

**Customer Feedback**

We are striving to improve our documentation quality and we appreciate your feedback. Email your opinions and comments to DocsFeedback@yealink.com.
Yealink SIP-T42G IP phone firmware contains third-party software under the GNU General Public License (GPL). Yealink uses software under the specific terms of the GPL. Please refer to the GPL for the exact terms and conditions of the license.

The original GPL license, source code of components licensed under GPL and used in Yealink products can be downloaded online:

About This Guide

Thank you for choosing the SIP-T42G IP Phone, an ultra-elegant Gigabit IP Phone which is exquisitely designed to provide business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Multicast Paging and Conference over an IP network.

This guide provides everything you need to quickly use your new phone. First, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Packaging Contents and Regulatory Notices sections in this guide before you set up and use the SIP-T42G IP phone.

Note
Network Directory and Network Call Log features are hidden for IP phones in the neutral firmware, which are designed for the BroadWorks environment. Please contact your system administrator for more information.

In This Guide

Topics provided in this guide include:

- Chapter 1 Overview
- Chapter 2 Getting Started
- Chapter 3 Customizing Your Phone
- Chapter 4 Basic Call Features
- Chapter 5 Advanced Phone Features

Summary of Changes

This section describes the changes to this guide for each release and guide version.

Changes for Release 80, Guide Version 80.60

The following sections are new:

- Shared Call Appearance (SCA) on page 120
- Bridged Line Appearance (BLA) on page 132

Major updates have occurred to the following sections:

- Icon Instructions on page 3
- LED Instructions on page 4
Changes for Release 80, Guide Version 80.20

The following sections are new:

- Logo Customization on page 46

Major updates have occurred to the following sections:

- Web User Interface on page 7
- Anonymous Call Rejection on page 101
- ReCall on page 79
- Intercom on page 110
- Multicast Paging on page 112
- Placing Calls on page 72
- Contact Management on page 30
- Auto Answer on page 76

Changes for Release 80, Guide Version 80.1

The following sections are new:

- Optional Accessories on page 12
- Short Message Service (SMS) on page 138

Major updates have occurred to the following sections:

- Phone Lock on page 25
- Auto Answer on page 76
- Local Directory on page 31
- Anonymous Call on page 100
- BLF List on page 105
- Appendix A - Time Zones on page 157

Changes for Release 73, Guide Version 73.16

The following sections are new:

- BLF List on page 105
- Call Completion on page 78
Major updates have occurred to the following sections:

- LED Instructions on page 4
- Ring Tones on page 28
- Anonymous Call on page 100
- Anonymous Call Rejection on page 101
- Troubleshooting on page 145
- Appendix A - Time Zones on page 157

**Changes for Release 72, Guide Version 72.2**

Major updates have occurred to the following sections:

- Documentations on page 10
- Packaging Contents on page 11

**Changes for Release 72, Guide Version 72.1**

The following section is new:

- Call Completion on page 78

Major updates have occurred to the following sections:

- LED Instructions on page 4
- Backlight on page 21
- Anonymous Call on page 100

**Changes for Release 71, Guide Version 71.120**

Major updates have occurred to the following sections:

- Icon Instructions on page 3
- DSS Keys on page 49
- Dial Plan on page 62
- Anonymous Call on page 100
- Troubleshooting on page 145
Changes for Release 71, Guide Version 71.90

Major updates have occurred to the following sections:

- Phone Status on page 17
- Directory on page 30
- Remote Phone Book on page 42

Index ............................................................................................................... 159
This chapter provides the overview of the SIP-T42G IP phone. Topics include:

- Hardware Component Instructions
- Icon Instructions
- LED Instructions
- User Interfaces
- Documentations

If you require additional information or assistance with your new phone, contact your system administrator.

**Hardware Component Instructions**

The main hardware components of the SIP-T42G IP phone are the LCD screen and the keypad.
Hardware component instructions of the SIP-T42G IP phone are:

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| ① LCD Screen | Shows information about calls, messages, soft keys, time, date and other relevant data:  
  - Call information—caller ID, call duration  
  - Icons (for example, `DND`)  
  - Missed call text or second incoming caller information  
  - Prompt text (for example, "Saving config file!")  
  - Time and date |
| ② Power Indicator LED | Indicates phone power and some feature statuses. |
| ③ Line Keys | Use these keys to activate up to twelve accounts and assign various features. |
| Mute Key | Toggles and indicates mute feature. |
| Headset Key | Toggles and indicates the headset mode. |
| Message Key | Accesses voice mails. |
| Redial Key | Redials a previously dialed number. |
| ⑤ Speakerphone Key | Toggles the hands-free speakerphone mode. |
| ⑥ Volume Key | Adjusts the volume of the handset, headset, speaker, and ringer. |
| ⑦ Keypad | Provides the digits, letters, and special characters in context-sensitive applications. |
| 🕒 🕒 🕒 🕒 | Scroll through the displayed information. |
| ⑧ OK | Confirms actions or answers incoming calls. |
| 🚹 | Cancels actions or rejects incoming calls. |
| ⑨ Soft Keys | Label automatically to identify their context-sensitive features. |
| ⑩ Speaker | Provides ringer and hands-free (speakerphone) audio output. |
| ⑪ Hookswitch Tab | Secures the handset in the handset cradle when the IP phone is mounted vertically. For more information on how to adjust the hookswitch tab, refer to Yealink Wall Mount Quick Installation Guide for Yealink IP Phones. |
| ⑫ Hookswitch | Picking up the handset from the handset cradle, the hookswitch bounces and the phone connects to the line, laying the handset down on the handset cradle, the phone disconnects from the line. |
**Icon Instructions**

Icons appearing on the LCD screen are described in the following table:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📱</td>
<td>Network is unavailable</td>

**LED Instructions**

**Power Indicator LED**

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>The phone is initializing.</td>
</tr>
<tr>
<td>Fast flashing red (300ms)</td>
<td>The phone is ringing.</td>
</tr>
<tr>
<td>Slow flashing red (1s)</td>
<td>The phone receives a text message or voice mail.</td>
</tr>
</tbody>
</table>
## Overview

| Off          | The phone is powered off.  
The phone is idle.  
The phone is busy.  
The call is placed on hold or is held.  
The call is muted.          |

### Line key LED

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
</table>
| Solid green  | The line is seized.  
The line is in conversation.                                         |
| Fast flashing green | The line receives an incoming call.                                      |
| Slow flashing green | The call is placed on hold.                                        |
| Off          | The line is inactive.                                                      |

### Line key LED (configured as a BLF key or BLF List key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid green</td>
<td>The monitored user is idle.</td>
</tr>
<tr>
<td>Fast flashing red (200ms)</td>
<td>The monitored user receives an incoming call.</td>
</tr>
</tbody>
</table>
| Solid red                           | The monitored user is busy.                                               
|                                     | The monitored user’s conversation is placed on hold (This LED status requires server support). |
| Slow flashing red (1s)              | The call is parked against the monitored user’s phone number.              |
| Off                                 | The monitored user does not exist.                                       |

### Line key LED (used as a page switch key)

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solid red</td>
<td>There is a parked call on the line key of the non-current page.</td>
</tr>
<tr>
<td>Solid green</td>
<td>There is a call on the line key of the non-current</td>
</tr>
<tr>
<td>Fast flashing green</td>
<td>The line receives an incoming call on the non-current page.</td>
</tr>
<tr>
<td>Fast flashing red</td>
<td>The monitored user receives an incoming call on the non-current page.</td>
</tr>
<tr>
<td>Off</td>
<td>Line keys on every page are idle.</td>
</tr>
</tbody>
</table>

### Line key LED (associated with a shared line)
The local SCA phone indicates the phone is involved in an SCA call, while the monitoring SCA phone indicates the phone is not involved in the SCA call.

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The shared line is idle.</td>
</tr>
<tr>
<td>Fast flashing green</td>
<td>The shared line receives an incoming call.</td>
</tr>
<tr>
<td>Solid green (for local SCA phone) Solid red (for monitoring SCA phone)</td>
<td>The shared line is in conversation. The shared line is dialing. The shared line is seized. The shared line conversation is barged in by the other shared line party.</td>
</tr>
<tr>
<td>Slow flashing green (for local SCA phone) Slow flashing red (for monitoring SCA phone)</td>
<td>The shared line conversation is placed on public hold.</td>
</tr>
<tr>
<td>Slow flashing green (for local SCA phone) Solid red (for monitoring SCA phone)</td>
<td>The shared line conversation is placed on private hold. For a multi-party call, all the shared line parties participating in this call place the shared line conversation on hold.</td>
</tr>
</tbody>
</table>

**Line key LED** (associated with a bridged line)

The local BLA phone indicates the phone is involved in a BLA call, while the monitoring BLA phone indicates the phone is not involved in the BLA call.

<table>
<thead>
<tr>
<th>LED Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The bridged line is idle.</td>
</tr>
<tr>
<td>Fast flashing green</td>
<td>The bridged line receives an incoming call.</td>
</tr>
<tr>
<td>Solid green (for local BLA phone) Solid red (for monitoring BLA phone)</td>
<td>The bridged line is in conversation. The bridged line is dialing. The bridged line is seized.</td>
</tr>
<tr>
<td>Slow flashing green (for local BLA phone) Slow flashing red (for monitoring BLA phone)</td>
<td>The bridged line conversation is placed on hold.</td>
</tr>
</tbody>
</table>

**Note**

The above introduces the default LED status. The statuses of the power indicator LED and BLF key are configurable via web user interface. For more information, refer to **Yealink_SIP-T2_Series_T19(P) E2_T4_Series_IP_Phone_Administrator_Guide**.
User Interfaces

Two ways to customize configurations of your SIP-T42G IP phone:

- The user interface on the IP phone.
- The user interface in a web browser on your PC.

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many cases, it is possible to use either the phone user interface and/or the web user interface interchangeably. However, in some cases, it is only possible to use one or the other interface to operate the phone and change settings.

Phone User Interface

You can customize your phone by pressing the Menu soft key to access the phone user interface. The Advanced Settings option is only accessible to the administrator, and the default administrator password is “admin” (case-sensitive). For more information on customizing your phone with the available options from the phone user interface, refer to Customizing Your Phone on page 21.

Web User Interface

In addition to the phone user interface, you can also customize your phone via web user interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the OK key on the phone when the phone is idle. Enter the IP address (e.g., http://192.168.0.10 or 192.168.0.10) in the address bar of a web browser on your PC. The default administrator user name and password are both “admin” (case-sensitive).

The options you can use to customize the IP phone via phone user interface and/or via web user interface are listed in the following table:

<table>

Getting Started

This chapter provides the following basic installation instructions and information for obtaining the best performance with the SIP-T42G IP phone. Topics include:

- Packaging Contents
- Phone Installation
- Phone Initialization
- Phone Status
- Basic Network Settings
- Registration
- Idle Screen

If you require additional information or assistance with your new phone, contact your system administrator.

Packaging Contents

The following components are included in your SIP-T42G IP phone package:

- SIP-T42G IP Phone
Check the list before installation. If you find anything missing, contact your system administrator.

Optional Accessories

The following items are optional accessories for your SIP-T42G IP phone. You need to purchase them separately if required.
• Power Adapter

• Wall Mount Bracket

• Headset

• Wireless Headset Adapter EHS36

**Phone Installation**

If your phone is already installed, proceed to Phone Initialization on page 16.

This section introduces how to install the phone:

1) Attach the stand or the optional wall mount bracket
2) Connect the handset and optional headset
3) Connect the network and power
1) Attach the stand or the optional wall mount bracket

**Desk Mount Method**

![Desk Mount Method Diagram]

**Wall Mount Method (Optional)**

![Wall Mount Method Diagram]

**Note**
The hookswitch tab has a lip which allows the handset to stay on-hook when the IP phone is mounted vertically.

For more information on how to attach the wall mount bracket, refer to *Yealink Wall Mount Quick Installation Guide for Yealink IP Phones*.

2) Connect the handset and optional headset

![Handset and Headset Connection Diagram]

**Note**
EHS36 is used for connecting the phone and a compatible wireless headset. For more information on how to use the EHS36, refer to *Yealink EHS36 User Guide*.
3) Connect the network and power

You have two options for power and network connections. Your system administrator will advise you which one to use.

- AC power (Optional)
- Power over Ethernet (PoE)

**AC Power (Optional)**

To connect the AC power:

1. Connect the DC plug on the power adapter to the DC5V port on the phone and connect the other end of the power adapter into an electrical power outlet.
2. Connect the included or a standard Ethernet cable between the Internet port on the phone and the one on the wall or switch/hub device port.

![Power connection diagram]

**Power over Ethernet**

With the included or a regular Ethernet cable, the SIP-T42G IP phone can be powered from a PoE-compliant switch or hub.
To connect the PoE:

1. Connect the Ethernet cable between the Internet port on the phone and an available port on the in-line power switch/hub.

Note

If in-line power is provided, you don’t need to connect the phone to the power adapter. Make sure the switch/hub is PoE-compliant.

The phone can also share the network with another network device such as a PC (personal computer). This is an optional connection.

Important! Do not remove power from the phone while it is updating firmware and configurations.

Phone Initialization

After your phone is powered on, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization by loading the saved configuration. The LCD screen displays “Welcome Initializing…please wait” during this process.

DHCP (Dynamic Host Configuration Protocol)

The phone attempts to contact a DHCP server in your network to obtain valid IPv4 network settings (e.g., IP address, subnet mask, default gateway address and DNS address) by default.

Note

If your network does not use DHCP, proceed to Basic Network Settings on page 18.
Phone Status

You can view phone status via phone user interface or web user interface.

Available information of phone status includes:

- Network status (e.g., IPv4 status, IP mode, MAC address).
- Phone status (e.g., product name, hardware version, firmware version, product ID, MAC address and device certificate status).
- Account status (e.g., register status of SIP accounts).

Note: You can view device certificate status via phone user interface only.

To view the phone status via phone user interface:

1. Press \( \text{OK} \), or press Menu \( \rightarrow \) Status.
2. Press \( \uparrow \) or \( \downarrow \) to scroll through the list and view the specific information.

To view the phone status via web user interface:

1. Open a web browser on your computer.
2. Enter the IP address in the browser’s address bar, and then press the Enter key.
3. Enter the user name (admin) and password (admin) in the login page.
4. Click Confirm to login.
The phone status is displayed on the first page of the web user interface.

### Basic Network Settings

If your phone cannot contact a DHCP server for any reason, you need to configure network settings manually. The IP phone can support either or both IPv4 and IPv6 addresses.

**To configure the IP address mode via phone user interface:**

1. Press **Menu** ➔ **Settings** ➔ **Advanced Settings** (default password: admin) ➔ **Network** ➔ **WAN Port**.
2. Press ( or ) or the **Switch** soft key to select IPv4, IPv6 or IPv4 & IPv6 from the IP Mode field.
3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

**To configure a static IPv4 address via phone user interface:**

1. Press **Menu** ➔ **Settings** ➔ **Advanced Settings** (default password: admin) ➔ **Network** ➔ **WAN Port**.
2. Press ( to select IPv4 and then press the **Enter** soft key.
3. Press ( to select **Static IPv4 Client** and then press the **Enter** soft key.
4. Enter the desired value in the IPv4, Subnet Mask, Default Gateway, IPv4 Pri.DNS and IPv4 Sec.DNS fields respectively.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

To configure a static IPv6 address via phone user interface:

1. Press Menu->Settings->Advanced Settings (default password: admin)
->Network->WAN Port.
2. Press \( \text{ } \) to select IPv6 and then press the Enter soft key.
3. Press \( \text{ } \) to select Static IPv6 Client and then press the Enter soft key.
4. Enter the desired value in the IPv6 IP, IPv6 IP Prefix, Default Gateway, IPv6 Pri.DNS and IPv6 Sec.DNS fields respectively.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

Note
Wrong network settings may result in inaccessibility of your phone and may also have an impact on your network performance. For more information on these parameters, contact your system administrator.

Registration

Generally, your phone will be deployed with multiple other phones. In this case, your system administrator will configure the phone parameters beforehand, so that after you start up your phone, the phone will be registered and ready for use. The SIP-T42G IP phone supports up to 12 accounts. If your phone is not registered, you may have to register it. For more information on how to register your phone, refer to Account Management on page 60.
Idle Screen

If the phone has successfully started up, the idle LCD screen will be displayed as below.

![Idle Screen Example]

The idle screen displays the label of the current account, time and date, and four soft keys.
Customizing Your Phone

You can customize your SIP-T42G IP phone by personally configuring certain settings, for example, time & date and ring tones. You can add contacts to the phone’s local directory manually or from call history. You can also personalize different ring tones for different callers.

This chapter provides basic operating instructions for customizing your phone. Topics include:

- General Settings
- Audio Settings
- Contact Management
- Call History Management
- System Customizations

If you require additional information or assistance with your new phone, contact your system administrator.

General Settings

Backlight

You can configure the backlight to adjust the brightness of the LCD screen. Backlight status on the LCD screen can be configured from the following options:

- **Always On**: Backlight is on permanently.
- **Always Off**: Backlight is off permanently.
- **15s, 30s, 60s, 120s, 300s, 600s, or 1800s**: Backlight is turned off when the phone is inactive after the designated time (in seconds).

To configure the backlight via phone user interface:

1. Press **Menu -> Settings -> Basic Settings -> Display -> Backlight**.
2. Press < or >, or the **Switch** soft key to select the desired value from the **Backlight Time** field.
3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Backlight is configurable via web user interface at the path **Settings -> Preference**.

### Language

The default language of the phone user interface is English. If the language of your web browser is not supported by the phone, the web user interface will use English by default. You can change the language for the phone user interface and the web user interface respectively.

**To change the language for the phone user interface:**

1. Press **Menu -> Settings -> Basic Settings -> Language**.
2. Press ▲ or ▼ to select the desired language.
3. Press the **Save** soft key to accept the change.

Text displayed on the phone user interface will change to the selected language.

**To change the language for the web user interface:**

1. Click on **Settings -> Preference**.
2. Select the desired language from the pull-down list of **Language**.
3. Click **Confirm** to accept the change.

Text displayed on the web user interface will change to the selected language.
Time & Date

The time and date are displayed on the LCD screen when the phone is idle. You can configure the phone to obtain the time and date from the Simple Network Time Protocol (SNTP) server automatically, or configure the date and time manually. If the phone cannot obtain the time and date from the SNTP server, contact your system administrator for more information.

To configure the SNTP settings via phone user interface:

1. Press Menu->Settings->Basic Settings->Time & Date->SNTP Settings.
2. Press ← or →, or the Switch soft key to select the time zone that applies to your area from the Time Zone field.
   The default time zone is "+8".

![SNTP Settings]

3. Enter the domain name or IP address of SNTP server in the NTP Server1 and NTP Server2 fields respectively.
4. Press ← or →, or the Switch soft key to select the desired value from the Daylight Saving field.
5. Press ← or →, or the Switch soft key to select the desired time zone name from the Location field.
   This field appears only if Daylight Saving field is selected Automatic.
   The default time zone name is China(Beijing).
6. Press the Save soft key to accept the change or the Back soft key to cancel.

**Note**

Please refer to Appendix A - Time Zones for the list of available time zones on the IP phone.

To configure the time and date manually via phone user interface:

2. Enter the specific time and date.

![Manual Settings]

3. Press the Save soft key to accept the change.
   The date and time displayed on the LCD screen will change accordingly.
To configure the time and date format via phone user interface:

1. Press **Menu** **Settings** -> **Basic Settings** -> **Time & Date** -> **Time & Date Format**.
2. Press or , or the **Switch** soft key to select the desired time format (12 Hour or 24 Hour) from the **Time Format** field.

3. Press or , or the **Switch** soft key to select the desired date format from the **Date Format** field.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

There are 7 available date formats. For example, for the date format “WWW DD MMM”, “WWW” represents the abbreviation of the weekday, “DD” represents the two-digit day, and “MMM” represents the first three letters of the month.

<table>
<thead>
<tr>
<th>Date Format</th>
<th>Example (2015-05-16)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WWW MMM DD</td>
<td>Sat May 16</td>
</tr>
<tr>
<td>DD-MMM-YY</td>
<td>16-May-15</td>
</tr>
<tr>
<td>YYYY-MM-DD</td>
<td>2015-05-16</td>
</tr>
<tr>
<td>DD/MM/YYYY</td>
<td>16/05/2015</td>
</tr>
<tr>
<td>MM/DD/YY</td>
<td>05/16/15</td>
</tr>
<tr>
<td>DD MMM YYYY</td>
<td>16 May 2015</td>
</tr>
<tr>
<td>WWW DD MMM</td>
<td>Sat 16 May</td>
</tr>
</tbody>
</table>

Time and date are configurable via web user interface at the path **Settings** -> **Time & Date**.

**Administrator Password**

The Advanced Settings option is only accessible to the administrator. The default administrator password is “admin”. For security reasons, you should change the default administrator password as soon as possible.

To change the administrator password via phone user interface:

1. Press **Menu** -> **Settings** -> **Advanced Settings** (default password: admin) -> **Set Password**.
2. Enter the current password in the **Current PWD** field.
3. Enter the new password in the **New PWD** field.

4. Re-enter the new password in the **Confirm PWD** field.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel. Administrator password is configurable via web user interface at the path **Security > Password**.

### Key as Send

You can set the "#" or "*" to perform as a send key while dialing.

**To configure key as send via phone user interface:**

1. Press **Menu > Features > Key as send**.
2. Press  or , or the **Switch** soft key to select # or * from the **Key as send** field, or select **Disabled** to disable this feature.

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Key as send is configurable via web user interface at the path **Features > General Information**.

### Phone Lock

You can lock your phone temporarily when you are not using it. This feature helps to protect your phone from unauthorized use.

Phone lock consists of the following:

- **Menu Key:** The Menu soft key is locked. You cannot access the menu of the phone until unlocked.
- **Function Keys:** The function keys are locked. You cannot use the MESSAGE, REDIAL, MUTE, OK, X, navigation keys and soft keys until unlocked.
All keys are locked, except the volume, digit keys and speakerphone key. You are only allowed to dial emergency numbers, reject incoming calls by pressing the X key or the Reject soft key, answer incoming calls by lifting the handset, pressing the speakerphone key, the HEADSET key, the Answer soft key or the OK key, and end the call by hanging up the handset, pressing the speakerphone key, the EndCall soft key or X key.

Note
The emergency number setting, if desired, must be set before lock activation. For more information, refer to Emergency Number on page 68.

To activate the phone lock via phone user interface:

1. Press Menu -> Settings -> Advanced Settings (default password: admin) -> Phone Lock.
2. Press or , or the Switch soft key to select Enabled from the Lock Enable field.
3. Press or , or the Switch soft key to select the desired type from the Lock Type field.
4. Enter the desired interval of automatic phone lock in the Lock Time Out field.
   The default timeout is 0. It means the phone will not be automatically locked. You need to long press # to lock it immediately when the phone is idle.
   If it is set to other values except 0 (e.g., 5), the phone will be locked when the phone is inactive in idle screen for the designated time (in seconds).
5. Press the Save soft key to accept the change.
   When the phone is locked, the LCD screen prompts “Phone locked.” and displays the icon 🗝.

To unlock the phone, you must know the phone unlock PIN. The default phone unlock PIN is “123”.
To change the PIN via phone user interface:

1. Press Menu > Settings > Basic Settings > Change PIN.
2. Enter the desired value in the Current PIN, New PIN and Confirm PIN fields respectively.

![Change PIN Interface]

3. Press the Save soft key to accept the setting or the Back soft key to cancel.

**Note**
The unlock PIN length must be within 15 digits.

To unlock the phone via phone user interface:

1. Press any locked key, the LCD screen prompts “Unlock PIN”.

![Unlock PIN Interface]

2. Enter the PIN in the Unlock PIN field.
3. Press the OK soft key to unlock the phone.

The icon disappears from the LCD screen.

You can long press or wait for a period of time (if configured) to lock the phone again.

**Note**
You can also unlock the phone by entering administrator password. When you enter the administrator password to unlock the phone, the phone will turn to the Reset Phone PIN interface.

To deactivate the phone lock via phone user interface:

1. Press Menu > Settings > Advanced Settings (default password: admin) > Phone Lock.
2. Press  or , or the Switch soft key to select Disabled from the Lock Enable field.

![Lock Interface]

3. Press the Save soft key to accept the change.
Phone Lock is configurable via web user interface at the path Features->Phone Lock.

**Audio Settings**

**Volume**

You can press the volume key to adjust the ringer volume when the phone is idle. You can also press the volume key to adjust the receiver volume of currently engaged audio devices (handset, speakerphone or headset) when the phone is in use.

**To adjust the volume when the phone is idle:**

1. Press to adjust the ringer volume.

**Note**

If the ringer volume is adjusted to minimum, the icon will appear on the LCD screen.

**To adjust the volume when the phone is during a call:**

1. Press to adjust the volume of currently engaged audio device (handset, speakerphone or headset).

**Ring Tones**

Ring tones are used to indicate incoming calls. You can select different ring tones to distinguish different accounts registered on your phone, or to distinguish your phone from your neighbor’s.

**To select a ring tone for the phone via phone user interface:**

1. Press Menu->Settings->Basic Settings->Sound->Ring Tones->Common.
2. Press or to select the desired ring tone.
3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

A ring tone for the phone is configurable via web user interface at the path **Settings > Preference > Ring Type**.

**To select a ring tone for the account via phone user interface:**

1. Press **Menu > Settings > Basic Settings > Sound > Ring Tones**.
2. Press ↑ or ↓ to select the desired account and then press the **Enter** soft key.
   ![Menu](image)

3. Press ↑ or ↓ to select the desired ring tone.
   
   If **Common** is selected, this account will use the ring tone selected for the phone.

   ![Select Ring Tones](image)

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

A ring tone for the account is configurable via web user interface at the path **Account > Basic > Ring Type**.

**To upload a custom ring tone for your phone via web user interface:**

1. Click on **Settings > Preference**.
2. Click **Browse** to locate a ring tone file (the file format must be *.wav) from your local system.

![Web User Interface](image)
3. Click **Upload** to upload the file.

**Note**

The priority of ring tone for an incoming call on the phone is as follows:
Contact ring tone (refer to **Adding Contacts**) > Group ring tone (refer to **Adding Groups**) > Account ring tone > Phone ring tone.

Both single custom ring tone file and total custom ring tone files must be within 100KB. Uploading custom ring tones for your phone is configurable via web user interface only.

---

**Contact Management**

This section provides the operating instructions for managing contacts. Topics include:

- Directory
- Local Directory
- Blacklist
- Remote Phone Book

**Directory**

Directory provides easy access to frequently used lists. The lists may contain Local Directory, History, Remote Phone Book and LDAP.

**To configure the directory via web user interface:**

1. Click on **Directory** > **Setting**.
2. In the **Directory** block, select the desired list from the **Disabled** column and then click **[ ]**.
   - The selected list appears in the **Enabled** column.
3. Repeat step 2 to add more lists to the **Enabled** column.
4. To remove a list from the **Enabled** column, select the desired list and click **[ ]**.
5. To adjust the display order of enabled lists, select the desired list and click **↑** or **↓**.
The LCD screen will display the list(s) in the adjusted order.

6. Click **Confirm** to accept the change.

**Note**
Directory is configurable via web user interface only.

**To view the directory via phone user interface:**

1. Press the **Directory** soft key when the phone is idle.

   The LCD screen displays the enabled list(s) in the directory.

   ![Directory screen](image)

   If there is only one list in the directory, press the **Directory** soft key to enter this list directly.

**Note**
If remote phone book and LDAP are not configured in advance, you cannot see remote phone book and LDAP lists on the phone user interface. For more information on remote phone book, refer to **Remote Phone Book** on page 42. For more information on the LDAP, refer to **Yealink_SIP-T2_Series_T19(P) E2_T4_Series_IP_Phone_Admistrator_Guide**.

**Local Directory**

The built-in phone directory can store the names and phone numbers of your contacts. You can store up to 1000 contacts and 48 groups in your phone's local directory. You can
add new groups and contacts, edit, delete or search for a contact, or simply dial a contact number from the local directory.

Adding Groups

To add a group to the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

   ![Directory Screen]

   If the Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.

2. Press the AddGr soft key.

3. Enter the desired group name in the Name field.

4. Press ← or →, or the Switch soft key to select the desired ring tone from the Ring field.

   If Auto is selected, this group will use the ring tone according to the priority: Contact ring tone (refer to Adding Contacts) > Account ring tone (refer to Ring Tones) > Phone ring tone (refer to Ring Tones). If a specific ring tone is selected, this group will use the ring tone according to the priority: Contact ring tone (refer to Adding Contacts) > Group ring tone.

   ![Add Group Screen]

5. Press the Add soft key to accept the change or the Back soft key to cancel.

You can also edit or delete any newly added contact groups.

Editing Groups

To edit a group in the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
Customizing Your Phone

If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.

2. Select the desired contact group.

3. Press the Option soft key and then select Detail from the prompt list.

4. Press ▲ or ▼ to highlight the group information and then edit.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

Deleting Groups

To delete a group from the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

   If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.

2. Select the desired contact group.

3. Press the Option soft key and then select Delete from the prompt list.

   The LCD screen prompts the following warning:

4. Press the OK soft key to confirm the deletion or the Cancel soft key to cancel.

   You can also delete all groups by pressing the Option soft key, and then select Delete All.
Adding Contacts

You can add contacts to the local directory in one of the following ways:

- Manually
- From call history
- From a remote phone book

Adding Contacts Manually

To add a contact to the local directory manually:

1. Press the **Directory** soft key.
   
The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
   
   If Local Directory is removed from the directory, press **Menu** > **Directory** > **Local Directory** to enter the local directory.
2. Select the desired contact group and then press the **Enter** soft key.
3. Press the **Add** soft key.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.

5. Press (4) or (5), or the **Switch** soft key to select the desired account from the **Account** field.
   
   If **Auto** is selected, the phone will use the default account when placing calls to the contact from the local directory.
6. Press (4) or (5), or the **Switch** soft key to select the desired ring tone from the **Ring** field.
   
   If **Auto** is selected, this contact will use the ring tone according to the priority: Group ring tone (refer to Adding Groups) > Account ring tone (refer to Ring Tones) > Phone ring tone (refer to Ring Tones).
7. Press the **Add** soft key to accept the change or the **Back** soft key to cancel.

**Note**

If the contact already exists in the directory, the LCD screen will prompt “Contact name existed!”.

Adding Contacts from Call History

To add a contact to the local directory from call history:

1. Press the **History** soft key.
2. Press ↑ or ↓ to highlight the desired entry.
3. Press the Option soft key, and then select Add to Contacts from the prompt list.

4. Press the OK soft key. And then enter the contact name.
5. Press the Save soft key to accept the change.

The entry is successfully saved to the local directory.

**Adding Contacts from Remote Phone Book**

To add a contact to the local directory from the remote phone book:

   
   If added to the directory, press Directory -> Remote Phone Book to enter the remote phone book.
2. Select the desired remote group and then press the Enter soft key.
3. Press (↑) or (↓) to highlight the desired entry.
4. Press the Option soft key, and then select Add to Contacts from the prompt list.
5. Press the Save soft key to save the contact to the local directory.

   If the contact already exists in the local directory, the LCD screen will prompt “Contact name existed, overwrite?”. Press the OK soft key to overwrite the original contact in the local directory or the Cancel soft key to cancel.

For more information on remote phone book operating, refer to Remote Phone Book on page 42.

**Editing Contacts**

To edit a contact in the local directory:

1. Press the Directory soft key.

   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.

   If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.
2. Select the desired contact group and then press the Enter soft key.
3. Press (↑) or (↓) to highlight the desired contact.
4. Press the Option soft key, and then select Detail from the prompt list.
5. Press ▲ or ▼ to highlight the contact information and then edit.

6. Press the Save soft key to accept the change or the Back soft key to cancel.
Deleting Contacts

To delete a contact from the local directory:

1. Press the Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
   If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.
2. Select the desired contact group and then press the Enter soft key.
3. Press \(^{2}\) or \(^{3}\) to highlight the desired contact.
4. Press the Option soft key, and then select Delete from the prompt list.
   The LCD screen prompts the following warning:
   ![Warning](image)
5. Press the OK soft key to confirm the deletion or the Cancel soft key to cancel.
   You can also delete all contacts by pressing the Option soft key, and then select Delete All.

Placing Calls to Contacts

To place a call to a contact from the local directory:

1. Press the Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
   If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.
2. Select the desired contact group and then press the Enter soft key.
3. Press \(^{2}\) or \(^{3}\) to highlight the desired contact.
4. Do one of the following:
   - If only one number for the contact is stored in the local directory, press the Send soft key to dial out the number.
   - If multiple numbers for the contact are stored in the local directory, press the Send soft key to display a list of numbers.
     Press \(^{2}\) or \(^{3}\) to highlight the desired number.
     Press the Send soft key to dial out the number.
Searching for Contacts

To search for a contact in the local directory:

1. Press the Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
   If Local Directory is removed from the directory, press Menu -> Directory -> Local Directory to enter the local directory.
2. Press the Search soft key.
3. Enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number) using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen. You can dial from the result list.

Search Source List in Dialing

You can search for a contact from the desired lists when the phone is in the dialing screen. The lists can be Local Directory, History, Remote Phone Book and LDAP.

To configure search source list in dialing via web user interface:

1. Click on Directory -> Setting.
2. In the Search Source List In Dialing block, select the desired list from the Disabled column and click  
   The selected list appears in the Enabled column.
3. Repeat step 2 to add more lists to the Enabled column.
4. To remove a list from the Enabled column, select the desired list and click  
5. To adjust the display order of the enabled lists, select the desired list and click  or  
The LCD screen will display search results in the adjusted order.

6. Click **Confirm** to accept the change.

**Note**

Search source list in dialing is configurable via web user interface only.

**To search for an entry in the enabled search source lists:**

1. Pick up the handset, press the speakerphone or press the line key.
2. Enter a few continuous characters of the entry’s name or continuous numbers of the entry’s phone number (office, mobile or other number) using the keypad.

   The entries in the enabled search source lists whose name or phone number matches the characters entered will appear on the LCD screen. You can press **to scroll to the desired entry, and then place a call to the entry.**

**Importing/Exporting Contact Lists**

You can manage your phone’s local directory via phone user interface or web user interface. But you can only import or export the contact list via web user interface.

**To import an XML contact list file via web user interface:**

1. Click on **Directory**->**Local Directory**.
2. Click **Browse** to locate a contact list file (the file format must be *.xml) from your local system.
3. Click **Import XML** to import the contact list.

The web user interface prompts "The original contact will be covered, continue?".

4. Click **OK** to complete importing the contact list.

To import a CSV contact list file via web user interface:

1. Click on **Directory** -> **Local Directory**.
2. Click **Browse** to locate a contact list file (the file format must be *.csv) from your local system.
3. (Optional.) Check the **Show Title** checkbox. 
   It will prevent importing the title of the contact information which is located in the first line of the CSV file.
4. Click **Import CSV** to import the contact list.
5. (Optional.) Mark the **On** radio box in the **Delete Old Contacts** field. 
   It will delete all existing contacts while importing the contact list.
6. (Optional.) Select the contact information you want to import into the local directory from the pull down list of **Index**.
At least one item should be selected to be imported into the local directory.

7. Click **Import** to complete importing the contact list.

**To export a contact list via web user interface:**

1. Click on **Directory** > **Local Directory**.
2. Click **Export XML** (or **Export CSV**).
3. Click **Save** to save the contact list to your local system.

**Note** Importing/exporting contact lists is available via web user interface only.

**Blacklist**

The built-in phone directory can store names and phone numbers for a blacklist. You can store up to 30 contacts, add, edit, delete or search for a contact in the blacklist directory, and even call a contact from the blacklist directory. Incoming calls from blacklist directory contacts will be rejected automatically.

**To add a contact to the blacklist directory manually:**

1. Press **Menu** > **Directory** > **Blacklist**.
2. Press the **Add** soft key.
3. Enter the name and the office, mobile or other numbers in the corresponding fields.

4. Press 4 or 5, or the **Switch** soft key to select the desired account from the **Account** field.
If Auto is selected, the phone will use the default account when placing calls to the contact from the blacklist directory.

5. Press the Add soft key to accept the change or the Back soft key to cancel.

To add a contact to the blacklist directory from the local directory:

1. Press Directory soft key.
   The IP phone enters the local directory directly as there is only Local Directory enabled in the directory by default.
   If Local Directory is removed from the directory, press Menu > Directory > Local Directory to enter the local directory.
2. Select the desired contact group and then press the Enter soft key.
3. Press (▲) or (▼) to highlight the desired contact.
4. Press the Option soft key and then select Add to Blacklist from the prompt list.
   The LCD screen prompts "Move selected to blacklist?".
5. Press the OK soft key to confirm the setting.

For operating instructions on editing, deleting, placing calls to and/or searching for contacts in the blacklist, refer to the operating instructions of Local Directory on page 31.

Remote Phone Book

You can add new contacts to the local directory, search for a contact, or simply dial a contact number from the remote phone book.

You can configure your new phone to access up to 5 remote phone books. For the access URL of the remote phone book, contact your system administrator.

To configure an access URL for a remote phone book via web user interface:

1. Click on Directory > Remote Phone Book.
2. Enter the access URL in the Remote URL field.
3. Enter the name in the **Display Name** field.

![Yealink T23](image)

4. Click **Confirm** to accept the change.

**Note**

An access URL for a remote phone book is configurable via web user interface only.

**To access your remote phone book via phone user interface:**

1. Press **Menu** > **Directory** > **Remote Phone Book**.
   
   If Remote Phone Book is added to the directory, press **Directory** > **Remote Phone Book** to enter the remote phone book.

2. Select the desired remote group, and then press the **Enter** soft key.
   
   The phone then connects to the remote phone book and proceeds to load it. The contacts in the remote phone book are displayed on the LCD screen.

![Remote Phone Book](image)

3. Press the **Back** soft key to back to the previous interface.

**To search for a contact in the remote phone book:**

1. Press **Menu** > **Directory** > **Remote Phone Book**.
   
   If Remote Phone Book is added to the directory, press **Directory** > **Remote Phone Book** to enter the remote phone book.

2. Select the desired remote group, and then press the **Enter** soft key to load the remote phone book.

3. Press the **Search** soft key.
4. Press the **Abc** soft key to change the input mode, and then enter a few continuous characters of the contact name or continuous numbers of the contact number using the keypad.

![Keypad Image]

The contacts whose name or phone number matches the characters entered will appear on the LCD screen. You can place a call from the result list.

**To place a call from the remote phone book:**

1. Press **Menu** -> **Directory** -> **Remote Phone Book**.
   
   If Remote Phone Book is added to the directory, press **Directory** -> **Remote Phone Book** to enter the remote phone book.

2. Select the desired remote group, and then press the **Enter** soft key to load the remote phone book.

3. Select the desired contact in the remote phone book.

4. Press the **Send** soft key.

In addition, you can enable the phone to present the caller identity stored in the remote phone book when receiving a call.

**To configure incoming/outgoing call lookup and update time interval via web user interface:**

1. Click on **Directory** -> **Remote Phone Book**.

2. Select **Enabled** from the pull-down list of **Incoming/Outgoing Call lookup**.

3. Enter the desired refresh period in the **Update Time Interval (Seconds)** field.

   The default value is 21600 seconds.

4. Click **Confirm** to accept the change.
Call History Management

The SIP-T42G IP phone maintains call history lists of Placed Calls, Received Calls, Missed Calls and Forwarded Calls. Each call history list supports up to 100 entries. You can view call history, place a call, add a contact or delete an entry from the call history list.

History record feature is enabled by default. If you don’t want to save the call history, you can disable the feature.

To disable history record via phone user interface:
1. Press Menu > Features > History Setting.
2. Press or , or the Switch soft key to select Disabled from the History Record field.
3. Press the Save soft key to accept the change or the Back soft key to cancel.

To view call history:
1. Press the History soft key. The LCD screen displays all call records.
2. Press or to switch between all, placed, received, missed and forwarded call lists.
3. Press or to select the desired entry.
4. Press the Option soft key, and then select Detail from the prompt list. The detailed information of the entry appears on the LCD screen.

To place a call from the call history list:
1. Press the History soft key.
2. Press or to switch between all, placed, received, missed and forwarded call lists.
3. Press or to select the desired entry.
4. Press the Send soft key.

To add a contact to the local directory (or blacklist directory) from the call history list:
1. Press the History soft key.
2. Press or to switch between all, placed, received, missed and forwarded call lists.
3. Press or to select the desired entry.
4. Press the **Option** soft key, and then select **Add to Contacts** (or **Add to Blacklist**) from the prompt list.

```
<table>
<thead>
<tr>
<th>Option</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Add to Contacts</td>
<td>Add to Blacklist</td>
</tr>
<tr>
<td>Delete All</td>
<td></td>
</tr>
<tr>
<td>Cancel</td>
<td>OK</td>
</tr>
</tbody>
</table>
```

5. Enter the desired values in the corresponding fields.

6. Press the **Save** soft key to accept the change.

For more information, refer to *Contact Management* on page 30.

**To delete an entry from the call history list:**

1. Press the **History** soft key.
2. Press ‹ or › to switch between all, placed, received, missed and forwarded call lists.
3. Press ‹ or › to select the desired entry.
4. Press the **Delete** soft key.

**To delete all entries from the call history list:**

1. Press the **History** soft key.
2. Press ‹ or › to switch between all, placed, received, missed and forwarded call lists.
3. Press the **Option** soft key, and then select **Delete All** from the prompt list.
4. Press the **OK** soft key.

The LCD screen prompts “Delete all the call records?”.

```
1019
1  A
10  A
Delete all the call records?
Cancel          OK
```

5. Press the **OK** soft key to confirm the deletion or the **Cancel** soft key to cancel.

---

**System Customizations**

**Logo Customization**

You can upload your custom logo which will be displayed on the idle screen.

**To upload a custom logo via web user interface:**

1. Click on **Features**\(\rightarrow\)**General Information**.
2. Select **Custom logo** from the pull-down list of **Use Logo**.
3. Click **Browse** to locate the logo file from your local system.

4. Click **Upload** to upload the file.

5. Click **Confirm** to accept the change.

**Note**

Delete item will appear after you upload a custom logo, you can click **Delete** to delete the custom logo.

The logo file format must be *.dob*, contact your system administrator for more information.

A custom logo can be uploaded via web user interface only.

### Headset Use

If you want to use a headset, physically connect your headset and activate the headset mode for use. For more information on physically connecting a headset, refer to **Phone Installation** on page 13.

### Headset Mode Activation/Deactivation

**To activate the headset mode:**

1. Press ( ) on the phone.

   The headset key LED illuminates solid green when the headset mode is activated.

   Press the line key or the **Answer** soft key to answer an incoming call. The call will be connected to your headset automatically.

   Enter the desired number and then press the **Send** soft key, the phone will then place a call using the headset automatically. For more information on using the headset to place a call, refer to **Placing Calls** on page 72.
To deactivate the headset mode:

1. Press \( \circ \) again on the phone.  
The headset key LED goes out when the headset mode is deactivated.

**Headset Prior**

You can use headset in priority when headset prior feature is enabled. This feature is especially useful for permanent or full-time headset users.

**To enable headset prior via web user interface:**

1. Click on **Features -> General Information**.
2. Select **Enabled** from the pull-down list of **Headset Prior**.

3. Click **Confirm** to accept the change.

**To use headset prior, you should activate the headset mode in advance:**

1. Physically connect the headset.
2. Press \( \circ \) to activate the headset mode.

**Note**

If headset prior is enabled, the headset mode will not be deactivated until you press the **Headset** key again.

If headset prior is disabled, the headset mode can be deactivated by pressing the speakerphone key or the **Headset** key.

Headset prior is configurable via web user interface only.
Dual Headset

You can use two headsets when dual headset feature is enabled. To use this feature, you must physically connect headsets to the headset jack and handset jack respectively. Once the phone connects to a call, the headset connected to the headset jack will have full-duplex capabilities, while the one connected to the handset jack will only be able to listen.

To enable dual headset via web user interface:

1. Click on Features -> General Information.
2. Select Enabled from the pull-down list of Dual-Headset.
3. Click Confirm to accept the change.

Note

Dual headset is configurable via web user interface only.

DSS Keys

There are two types of DSS keys: Line Keys and Programable Keys. Details will be introduced in the following. The SIP42G IP phone supports 15 line keys.

Line Keys

You can assign predefined functionalities to line keys. You can also define a label for a line key feature which will appear on the LCD screen. Line keys allow you to quickly access features such as recall and voice mail. The line key LEDs will indicate the monitored status when line keys are assigned with particular features, such as BLF. The default key type of line key 1-12 is Line. The default key type of line key 13-15 is N/A,
which indicates that this line key provides no functionality until configuration.

To assign functionality to a line key via phone user interface:

1. Press Menu->Features->DSS Keys.
2. Select the desired line key, and then press the Enter soft key.
3. Select the desired key type from the Type field.
4. (Optional.) Select the desired key event type from the Key Type field.
5. (Optional.) Select the desired line from the Account ID field.
6. (Optional.) Enter a string that will appear on the LCD screen in the Label field.
7. (Optional.) Enter the corresponding value in the Value field.
8. (Optional.) Enter the corresponding value in the Extension field.
9. Press the Save soft key to accept the change or the Back soft key to cancel.

Line key is configurable via web user interface at the path DSSKey->Line Key.

Note
When the phone is idle, you can also long press the line key to configure it directly on the phone.

You can assign functionalities to 15 line keys. These 15 line keys are indicated on three pages. When you assign functionality to line key 1-6, labels of line keys are indicated on the first page.

The following figure shows an example:

![Line key configuration example](image)

When you assign functionalities to line key 7-15, labels of the line key 6-10 are indicated on the second page, and labels of the line key 11-15 are indicated on the third page.

The line key in the right bottom is used to switch pages.

The following figure shows an example:
The following table lists the page icons:

<table>
<thead>
<tr>
<th>Icons/Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Page Icon 1" /></td>
<td>Indicates the current page of line keys.</td>
</tr>
<tr>
<td><img src="image" alt="Page Icon 2, 3" /></td>
<td>Indicates the non-current page of line keys.</td>
</tr>
<tr>
<td>Fast flashing</td>
<td>The BLF monitored user receives an incoming call on the non-current page. The line on the non-current page receives an incoming call. There is a hold call on the line on the non-current page.</td>
</tr>
</tbody>
</table>

**Page Tips**

You can use page tips feature to enable the page icon and page switch key LED to indicate different statuses. This feature is disabled by default.

The following table lists the page icon status to indicate different statuses:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Page Icon" /></td>
<td>Fast flashing: The BLF monitored user receives an incoming call on the non-current page. The line receives an incoming call on the non-current page.</td>
</tr>
</tbody>
</table>

For more information on the page switch key LED status, refer to LED Instructions on page 4.

To configure the page icon to indicate status via web user interface:

1. Click on **DSSKey > Line Key**.
2. Select **Enabled** from the pull-down list of **Enable Page Tips**.
3. Click **Confirm** to accept the change.

**Note**
The page icon status is configurable via web user interface only.

Line key features are explained in the following subchapters in detail:

- Line
- Speed Dial
- Voice Mail
- Directed Pickup
- Group Pickup
- DTMF
- Prefix
- Local Group
- XML Group
- XML Browser
- LDAP
- Conference
- Forward
- Transfer
- Hold
- DND
- SMS
- Group Listening
- Zero Touch
- URL
- Phone Lock
- Directory

For the features not listed above, refer to **Basic Call Features** on page 71 and **Advanced Phone Features** on page 103. For more information, contact your system administrator.

**Line**

You can use this key feature to accept incoming calls, place active calls on hold or resume a held call. It performs in the same way as a hard line key.

**Dependencies:** **Type (Line)**

- **Account ID** *(the account this feature will be applied to)*
- **Label** *(key label displayed on the LCD screen)*
Value (Default/Lock)

Usage: When receiving an incoming call, the DSS key LED flashes green:
1. Press the DSS key to accept the incoming call.
2. Press the DSS key to place a new call and the active call is placed on hold.
3. Press the DSS key again to resume the held call.

If you select Lock from the Value field, the line keys located in the same position of the other page will be automatically assigned Line feature with Lock filled in the Value field. This feature is only applicable to line key 1-9. Then you can use this key on every page.

If you select Default from the Value field, you can only use this key on the current page.

Speed Dial

You can use this key feature to speed up dialing the numbers frequently used or hard to remember.

Dependencies: Type (Speed Dial)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the number you want to dial out)

Usage: Press the DSS key to dial out the number specified in the Value field, using the account selected from the Account ID field.

Voice Mail

You can use this key feature to quickly connect a voice mail. For more information, refer to Voice Mail on page 140.

Dependencies: Type (Key Event)
- Key Type (Voice Mail)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the voice mail access code)

Usage: Press the DSS key to dial out the voice mail access code. Then follow the voice prompt to listen to voice mails.

Directed Pickup

You can use this key feature to answer someone else’s incoming call on the phone.

Dependencies: Type (Key Event)
- Key Type (DPickup)
- Account ID (the account this feature will be applied to)
- Label (key label displayed on the LCD screen)
- Value (the directed pickup code followed by the target phone number)

Usage: Press the DSS key on your phone when the target phone number receives an
incoming call. The call is then answered on your phone.

**Group Pickup**

You can use this key feature to answer incoming calls in a group that is associated with their own group.

**Dependencies:**  
*Type (Key Event)*  
- **Key Type:** (GPickup)  
- **Account ID** (the account this feature will be applied to)  
- **Label** (key label displayed on the LCD screen)  
- **Value** (the group pickup feature code)

**Usage:** Press the DSS key on your phone when a phone number in the group receives an incoming call. The call is answered on your phone.

**DTMF**

You can use this key feature to send the specification of arbitrary key sequences via DTMF.

**Dependencies:**  
*Type (Key Event)*  
- **Key Type:** (DTMF)  
- **Label** (key label displayed on the LCD screen)  
- **Value** (DTMF sequence)

**Note**: DTMF sequence can only contain "0-9", ",", "+" and "A-D".

**Usage:** Press the DSS key during an active call to send the key sequence specified in the **Value** field.

**Prefix**

You can use this key feature to add a specified prefix number before the dialed number.

**Dependencies:**  
*Type (Key Event)*  
- **Key Type:** (Prefix)  
- **Label** (key label displayed on the LCD screen)  
- **Value** (the prefix number)

**Usage:** Press the DSS key when the phone is idle, the phone will then enter the pre-dialing screen and display the prefix number that you specified in the **Value** field. You can enter the remaining digits and then dial out.

**Local Group**

You can use this key feature to quickly access a contact group in the local directory. For more information, refer to Local Directory on page 31.
Customizing Your Phone

**XML Group**

You can use this key feature to quickly access a remote group in your remote phone book. You should configure remote phone book in advance. For more information, refer to Remote Phone Book on page 42.

**Usage:** Press the DSS key to access the remote group specified in the **PhoneBook** field.

**XML Browser**

You can use this key feature to quickly access a XML browser. The XML browser allows you to create custom services which meet your functional requirements on the server. You can customize practical applications, such as weather report, stock information, Google search, etc.

**Usage:** Press the DSS key to access the XML browser specified in the **Value** field.

**LDAP**

You can use this key feature to quickly access a LDAP search screen.

**Usage:**

1. Press the DSS key to access the LDAP search screen.
2. Enter a few continuous characters of the contact name or continuous numbers of the contact number using the keypad.

The contacts whose name or phone number matches the characters entered will appear on the LCD screen.
Conference

You can use this key feature to set up a conference call. For more information, refer to Conference on page 93.

Dependencies: Type (Key Event)

- Key Type (Conf)
- Label (key label displayed on the LCD screen)
- Value (the number you want to add to the conference)

Usage: Press the DSS key during an active call to set up a conference with the number specified in the Value field.

Note: If the Value field is left blank, the DSS key performs the same as the Conference soft key during a call.

Forward

You can use this key feature to forward an incoming call to someone else. For more information, refer to Call Forward on page 85.

Dependencies: Type (Key Event)

- Key Type (FWD)
- Label (key label displayed on the LCD screen)
- Value (the number you want to forward to)

Usage: Press the DSS key to forward an incoming call to the number specified in the Value field.

Note: If the Value field is left blank, the DSS key performs the same as the FWD soft key when receiving an incoming call.

Transfer

When there is an active call on the phone, you can use this key feature to handle the call differently depending on the transfer mode assigned to the DSS key.

Dependencies: Type (Key Event)

- Key Type (Tran)
- Label (key label displayed on the LCD screen)
- Value (the number you want to transfer to)

Usage:

- When the transfer mode via DSS key is Blind Transfer, press the DSS key to complete the blind transfer to the number specified in the Value field.
- When the transfer mode via DSS key is Attended Transfer, press the DSS key to dial out the number specified in the Value field, and then perform the attended or
Customizing Your Phone

semi-attended transfer.

- When the transfer mode via DSS key is **New Call**, press the DSS key to place a new call to the number specified in the **Value** field.

**Note**

Transfer mode via DSS key is configurable via web user interface at the path **Features - Transfer - Transfer Mode via Dsskey**.

If the **Value** field is left blank, the DSS key performs the same as the **Tran** soft key during a call.

**Hold**

You can use this key feature to place an active call on hold or retrieve a held call.

**Dependencies:** **Type** (**Key Event**)

**Key Type** (Hold)

**Label** (key label displayed on the **LCD** screen)

**Usage:**

1. Press the DSS key during an active call to place the call on hold.
2. Press the DSS key again to retrieve the held call.

**DND**

You can use this key feature to activate or deactivate the DND mode. You can also use this key feature to access the custom DND screen. For more information, refer to **Do Not Disturb (DND)** on page 81.

**Dependencies:** **Type** (**Key Event**)

**Key Type** (DND)

**Label** (key label displayed on the **LCD** screen)

**Usage:**

When DND is in phone mode:

1. Press the DSS key to activate DND.
2. Press the DSS key again to deactivate DND.

When DND is in custom mode:

1. Press the DSS key to access the custom DND screen. You can activate or deactivate DND for one or all accounts.

**Note**

When DND is activated, the DND key LED will illuminate solid green, and the incoming calls will be rejected automatically.

**SMS**

You can use this key feature to quick access text message. For more information, refer to **Short Message Service (SMS)** on page 138.
Dependencies: **Type (Key Event)**

**Key Type (SMS)**

**Usage:** Press the DSS key when the phone is idle to access text message.

**Group Listening**

You can use this key feature to activate the Speakerphone and Handset/Headset mode at the same time. It is suitable for the group conversations which have more than one person present at one end. You are able to speak and listen through the handset/headset, while the others nearby can only listen through the speaker.

**Dependencies: ****Type (Key Event)**

**Key Type (Group Listening)**

**Label (key label displayed on the LCD screen)**

**Usage:**
1. During a call, press the DSS key to activate the group listening mode.
   
   You can then speak and listen through the handset/headset, while other people at your side can only listen through the speaker at the same time.
2. Press the DSS key again to deactivate the group listening mode.

**Zero Touch**

You can use this key feature to quickly configure auto provision and network parameters.

**Dependencies: ****Type (Key Event)**

**Key Type (Zero Touch)**

**Label (key label displayed on the LCD screen)**

**Usage:**
1. Press the DSS key to access the zero touch screen.
2. Press the **OK** soft key within a few seconds.
3. Configure the network parameters in the corresponding fields.
4. Press the **Next** soft key.
5. Configure the auto provision parameters in the corresponding fields.
6. Press the **OK** soft key.
   
   The phone will reboot to update configurations.

**URL**

You can use this key feature to trigger the phone to send an HTTP GET request containing a specific URL.

**Dependencies: ****Type (URL)**

**Label (key label displayed on the LCD screen)**

**Value (the URL contained in the HTTP GET request)**

**Usage:** Press the DSS key to trigger the phone to send an HTTP GET request containing
the URL specified in the Value field.

**Phone Lock**

You can use this key feature to immediately lock your phone instead of long pressing #. For more information, refer to Phone Lock on page 25.

**Dependencies:** Type (Phone Lock)

- **Label** (key label displayed on the LCD screen)

**Usage:** Press the DSS key to immediately lock your phone instead of long pressing #.

**Directory**

You can use this key feature to easily access frequently used lists. For more information, refer to Directory on page 30.

**Dependencies:** Type (Directory)

- **Label** (key label displayed on the LCD screen)

**Usage:** Press the DSS key to immediately access frequently used lists.

**Note**

The DSS key performs the same function as the Directory soft key when the phone is idle.

**Programable Keys**

You can customize the soft keys, navigation keys and function keys.

**To customize programable keys via web user interface:**

1. Click on DSSKey -> Programable Key.
2. Customize specific features for these keys.

3. (Optional.) Enter a string that will appear on the LCD screen in the Label field. Label is configurable only when customizing SoftKey 1-4.
4. Click Confirm to accept the change.
You can click **Reset to default** to reset custom settings to defaults.
Then you can press the keys on the phone to perform the features you configured.
For example:

**Switch Account Up**
You can press this key to switch default account.

**Dependencies:** Type *(Switch Account Up)*

**Usage:** Press the programmable key to scroll up the account list to select the desired default account.

**Switch Account Down**
You can press this key to switch default account.

**Dependencies:** Type *(Switch Account Down)*

**Usage:** Press the programmable key to scroll down the account list to select the desired default account.

**Note**
Programmable keys are configurable via web user interface only.

**Account Management**

You can register one or multiple accounts on the SIP-T42G IP phone. You can also configure each line key to associate with an account or configure multiple line keys to associate with an account.

**Account Registration**

**To register an account via phone user interface:**

1. Press **Menu** -> **Settings** -> **Advanced Settings** (default password: admin) -> **Accounts**.
2. Select the desired account and then press the **Enter** soft key.
3. Select **Enabled** from the **Active Line** field.

4. Enter the desired value in **Label**, **Display Name**, **Register Name**, **User Name**, **Password** and **SIP Server1/2** fields respectively. Contact your system administrator for more information.
5. If you use the outbound proxy servers, do the following:
   1) Press ▼ or ► or the **Switch** soft key to select **Enabled** from the **Outbound**
Customizing Your Phone

Status field.

2) Enter the desired value in the Outbound Proxy1/2 and Proxy Fallback Interval fields respectively. Contact your system administrator for more information.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

You can repeat steps 2 to 6 to register more accounts.

The following figures demonstrate single or multiple accounts registered on the phone:

Single account:

![Single account image]

Multiple accounts:

![Multiple accounts image]

To disable an account via phone user interface:

1. Press Menu->Settings->Advanced Settings (default password: admin) -> Accounts.
2. Select the desired account and then press the Enter soft key.
3. Select Disabled from the Active Line field.
4. Press the Save soft key to accept the change or the Back soft key to cancel.

Registering an account is configurable via web user interface at the path Account->Register.

Note: Default account can be set by pressing or in the idle screen. It has priority when placing a call. The phone’s default account cannot be changed after reboot.
Multiple Line Keys per Account

You can configure multiple line keys to associate with an account. This enhances call visualization and simplifies call handling.

If this is the case, the LCD screen will resemble the following figure:

Incoming calls to this account will be distributed evenly among the available line keys. Outgoing calls will be distributed similarly.

Your phone can be configured to have a combination of accounts with a single line key and accounts with multiple line keys.

Dial Plan

Dial plan is a string of characters that governs the way your SIPT42G IP phone processes the inputs received from your phone keypad. The SIPT42G IP phone supports the following dial plan features:

- Replace Rule
- Dial-now
- Area Code
- Block Out

Basic expression syntaxes you need to know:

<table>
<thead>
<tr>
<th>Syntax</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>.</td>
<td>The dot &quot;.&quot; can be used as a placeholder or multiple placeholders for any character. Example: &quot;12.&quot; would match &quot;123&quot;, &quot;1234&quot;, &quot;12345&quot;, &quot;12abc&quot;, etc.</td>
</tr>
<tr>
<td>x</td>
<td>An &quot;x&quot; can be used as a placeholder for any character. Example: &quot;12x&quot; would match &quot;121&quot;, &quot;122&quot;, &quot;123&quot;, &quot;12a&quot;, etc.</td>
</tr>
</tbody>
</table>
### Syntax

<table>
<thead>
<tr>
<th>Syntax</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>-</td>
<td>Numeric ranges are allowed within the brackets: Digit “-“ Digit. Example: “[5-7]” would match the number “5”, “6” or “7”.</td>
</tr>
<tr>
<td>[]</td>
<td>The square brackets “[]” can be used as a placeholder for a single character which matches any of a set of characters. Example: &quot;91[5-7]1234&quot; would match “9151234”, “9161234”, “9171234”.</td>
</tr>
<tr>
<td>()</td>
<td>The parentheses &quot;( )&quot; can be used to group together patterns, for instance, to logically combine two or more patterns. Example: &quot;((1-9))(2-7)3&quot; would match “923”, “153”, “773”, etc.</td>
</tr>
<tr>
<td>$</td>
<td>The “$” followed by the sequence number of a parenthesis means the characters placed in the parenthesis. The sequence number stands for the corresponding parenthesis. Example: A replace rule configuration, Prefix: “001(xxx)45(xx)”, Replace: “9001$145$2”. When you dial out “0012354599” on your phone, the IP phone will replace the number with “90012354599”. “$1” means 3 digits in the first parenthesis, that is, “235”. “$2” means 2 digits in the second parenthesis, that is, “99”.</td>
</tr>
</tbody>
</table>

### Replace Rule

You can configure one or more replace rules (up to 100) to remove the specified string and replace it with another string. You can configure a pattern with wildcards (expression syntax refer to the table above), so that any string that matches the pattern will be replaced. This feature is convenient for you to dial out a long number. For example, a replace rule is configured as “Prefix: 1” and “Replace: 1234”, when you try to dial out the number “1234”, you just need to enter “1” on the phone and then press the Send soft key.

**To add a replace rule via web user interface:**

1. Click on Settings -> Dial Plan -> Replace Rule.
2. Enter the string (e.g., 1) in the Prefix field.
3. Enter the string (e.g., 1234) in the Replace field.
4. Enter the desired line ID in the **Account** field or leave it blank.

```
Log Dial
```

5. Click **Add** to add the replace rule.

When you enter the number “1” using the keypad and then press the **Send** soft key, the phone will dial out “1234” instead.

**Note**

The valid values for the **Account** field can be one or more digits among 1-12. Every two digits must be separated by a comma. For example, when you enter the value “1, 2” in the **Account** field, this replace rule will apply to account 1 and account 2.

If you leave the **Account** field blank or enter 0, the replace rule will apply to all accounts.

To edit a replace rule via web user interface:

1. Click on **Settings** > **Dial Plan** > **Replace Rule**.
2. Select the desired replace rule by checking the checkbox.
3. Edit values in the **Prefix** and **Replace** fields.
4. Enter the desired line ID in the **Account** field or leave it blank.
5. Click **Edit** to accept the change.

To delete one or more replace rules via web user interface:

1. Click on **Settings** > **Dial Plan** > **Replace Rule**.
2. Select the one or more replace rules by checking the checkbox(es).
3. Click **Del** to delete the replace rule(s).

**Note**

Replace rule is configurable via web user interface only.
**Dial-now**

You can configure one or more dial-now rules (up to 100) on your phone. When the dialed number matches the dial-now string, the number will be dialed out automatically. For example, a dial-now rule is configured as "2xx", any entered three-digit string beginning with 2 will then be dialed out automatically on the phone.

**To add a dial-now rule via web user interface:**

1. Click on **Settings > Dial Plan > Dial-now**.
2. Enter the desired value (e.g., 2xx) in the **Rule** field.
3. Enter the desired line ID in the **Account** field or leave it blank.
   
   For more information on the valid values for the **Account** field, refer to **Replace Rule** on page 63.

4. Click **Add** to add the dial-now rule.

   When you enter the number “234” using the keypad, the phone will dial out “234” automatically without the pressing of any key.

**Note**

You can also edit or delete the dial-now rule, refer to **Replace Rule** on page 63 for more information.

Dial-now rule is configurable via web user interface only.

**Delay Time for Dial-Now Rule**

You can configure the interval for dial-now rules. That is, you can configure your phone to automatically dial out the phone number which matches a dial-now rule, after the designated period of time.
To configure the delay time for dial-now rule via web user interface:

1. Click on **Features** -> **General Information**.
2. Enter the time between 1 and 14 (seconds) in the **Time-Out for Dial-Now Rule** field.

3. Click **Confirm** to accept the change.

**Note**

Delay time for dial-now rule is configurable via web user interface only.

### Area Code

Area codes are also known as Numbering Plan Areas (NPAs). They usually indicate geographical areas in a country. This feature is necessary when dialing a phone number outside the code area. For example, an area code is configured as “Code: 0592, Min Length: 1, Max Length: 15”. When you dial out the number “56789” (the length of the number is between 1 and 15), the phone will add the area code and dial out the number “059256789”. You can only configure one area code rule on your phone.

To configure the area code and lengths via web user interface:

1. Click on **Settings** -> **Dial Plan** -> **Area Code**.
2. Enter the desired values in the **Code**, **Min Length (1-15)** and **Max Length (1-15)** fields.
3. Enter the desired line ID in the **Account** field or leave it blank.
For more information on the valid values for the **Account** field, refer to **Replace Rule** on page 63.

4. Click **Confirm** to accept the change.

**Note**

The default value of minimum and maximum length is 1 and 15 respectively.

Area code is configurable via web user interface only.

**Block Out**

You can block specific numbers (up to 10) from being dialed on your phone. When you dial a block out number on your phone, the dialing will fail and the LCD screen will prompt "Forbidden Number".

**To add a block out number via web user interface:**

1. Click on **Settings** > **Dial Plan** > **Block Out**.
2. Enter the desired value in the **BlockOut Number** field.
3. Enter the desired line ID in the **Account** field or leave it blank.
For more information on the valid value of the Account field, refer to Replace Rule on page 63.

4. Click Confirm to add the block out number.

**Note**

Block out number is configurable via web user interface only.

**Emergency Number**

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when necessary. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation. You can dial these numbers when the phone is locked. For more information on phone lock, refer to Phone Lock on page 25.

**Note**

Contact your local phone service provider for available emergency numbers in your area.

**To specify emergency numbers via web user interface:**

1. Click on Features -> Phone Lock.
2. Enter the emergency number in the Emergency field.
For multiple emergency numbers, enter a comma between every two numbers. The default emergency numbers are 112, 911 and 110.

3. Click **Confirm** to accept the change.

**Note**  
Emergency number is configurable via web user interface only.

**Live Dialpad**

You can enable live dialpad feature on the SIP-T42G IP phone, which enables the IP phone to automatically dial out a phone number without pressing the send key. You can also configure a delay, and then the phone will dial out the phone number automatically after the designated period of time.

**To enable live dialpad via web user interface:**

1. Click on **Settings > Preference**.
2. Select **Enabled** from the pull-down list of **Live Dialpad**.
3. Enter the desired delay time in the **Inter Digit Time (1~14s)** field.
The default delay time is 4 seconds.

4. Click **Confirm** to accept the change.

**Note**
Live dialpad is configurable via web user interface only.

**Hotline**

You can dial a hotline number immediately upon lifting the handset, pressing the speakerphone key or the line key. You can also configure a delay, and then the phone will dial out the hotline number automatically after the designated period of time.

**To configure the hotline number via phone user interface:**

1. Press **Menu** -> **Features** -> **Hot Line**.
2. Enter the desired number in the **Hot Number** field.
3. Enter the delay time (in seconds) in the **Hotline Delay** field.
   - The valid values range from 0 to 10 (seconds) and the default value is 4.
4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Hotline is configurable via web user interface at the path **Features** -> **General Information**.
Basic Call Features

The SIP-T42G IP phone is designed to be easily used like a regular phone on a public switched telephone network (PSTN). You can place calls, answer calls, transfer a call to someone else, or conduct a conference call.

This chapter provides basic operating instructions for the SIP-T42G IP phone. Topics include:

- Placing Calls
- Answering Calls
- Ending Calls
- Redialing Numbers
- Recent Call In Dialing
- Auto Answer
- Auto Redial
- Call Completion
- ReCall
- Call Mute
- Call Hold/Resume
- Do Not Disturb (DND)
- Call Forward
- Call Transfer
- Call Waiting
- Conference
- Call Park
- Call Pickup
- Anonymous Call
- Anonymous Call Rejection

If you require additional information or assistance with your new phone, contact your system administrator.
Placing Calls

You can place a call in one of three ways using your SIP-T42G IP phone:

- Using the handset
- Using the speakerphone
- Using the headset

You can also dial the number first, and then choose the way you want to speak to the other party.

You can also search and dial a contact from call history, local directory or remote phone book. For more information, refer to Contact Management on page 30 and Call History Management on page 45.

During a call, you can alternate between Speakerphone, Headset, or Handset mode by pressing the speakerphone key, the Headset key, or by picking up the handset.

The call duration of the active call, called party’s name and phone number are visible on the LCD screen. In the figure below, the call to “Tom” (the phone number: 1021) has lasted 17 seconds.

To place a call using the handset:

1. Pick up the handset.
2. Enter the desired number using the keypad.
3. Press \( \text{#} \), \( \text{\#} \), or the Send soft key.

The # key is configured as a send key by default. You can also set the * key as the send key, or set neither. For more information, refer to the Key as Send on page 25.

Note

You can also dial using the SIP URI or IP address. To obtain the IP address of a phone, press the OK key when the phone is idle. The maximum length of SIP URI or IP address length is 32 characters. For example, SIP URI: 3606@sip.com, IP: 192.168.1.15.

Your phone may not support direct IP dialing. Contact your system administrator for more information.

To place a call using the hands-free speakerphone mode:

Do one of the following:

- With the handset on-hook, press \( \text{\#} \) or the line key to obtain a dial tone.
  Enter the desired number using the keypad.
  Press \( \text{OK} \), \( \text{\#} \), or the Send soft key.
Basic Call Features

With the handset on-hook, enter the desired number using the keypad.
Press \[\text{[0]}\], \[\text{[#]}\], \[\text{[ok]}\] or the Send soft key.

To place a call using the headset:

Do one of the following:

- With the optional headset connected, press \[\text{[p]}\] to activate the headset mode.
  Press the line key to obtain a dial tone.
  Enter the desired number using the keypad.
  Press \[\text{[ok]}\], \[\text{[#]}\], or the Send soft key.

- With the optional headset connected, press \[\text{[p]}\] to activate the headset mode.
  Enter the desired number using the keypad.
  Press \[\text{[ok]}\], \[\text{[#]}\], or the Send soft key.

Note
To permanently use the headset mode, refer to Headset Prior on page 48.

The SIP-T42G IP phone can handle multiple calls at a time. However, only one active call (the call that has audio associated with it) can be in progress at any time, other calls are placed on hold. The SIP-T42G IP phone can handle a maximum of 50 calls at one time.

To place multiple calls:

You can have more than one call on your SIP-T42G IP phone. To place a new call during an active call, do one of the following:

- Press the line key. The active call is placed on hold.
  Enter the desired number using the keypad.
  Press \[\text{[ok]}\], \[\text{[#]}\], or the Send soft key.

- Press the Hold soft key to place the original call on hold.
  Press the New Call soft key.
  Enter the desired number using the keypad.
  Press \[\text{[ok]}\], \[\text{[#]}\], or the Send soft key.

You can press \[\text{[^]}\] or \[\text{[v]}\] to switch between calls, and then press the Resume soft key to retrieve the desired call.

Note
If multiple accounts are registered on the phone, you can first press the desired line key in the idle screen or press the Line soft key in the dialing screen, and then you can use the selected account to place a call.
Answering Calls

When you are not in another call, you can answer a call in one of three ways:

- Using the handset
- Using the speakerphone
- Using the headset

**Note**
You can reject incoming calls by pressing the X key or the Reject soft key. You can also activate Do Not Disturb mode to ignore the incoming calls without ringing on your phone. For more information, refer to Do Not Disturb (DND) on page 81.

You can forward incoming calls to someone else by pressing the FWD soft key. For more information, refer to Call Forward on page 85.

**Answering When Not in Another Call**

Call duration and destination will always appear on the LCD screen for the active call.

To answer a call using the handset:

1. Pick up the handset.

To answer a call using the hands-free speakerphone mode:

Do one of the following:

- Press \[\text{Speaker}\].
- With the handset on-hook and the headset mode deactivated, press the Answer soft key.
- With the handset on-hook and the headset mode deactivated, press the line key (the line key LED flashes green).

To answer a call using the headset:

Do one of the following:

- Press \[\text{Headset}\].
- With the headset mode activated, press the Answer soft key.
- With the headset mode activated, press the line key (the line key LED flashes green).

**Answering When in Another Call**

If you have an active call, and an incoming call arrives on the phone, do one of the following:

- Press the Answer soft key.

The incoming call is answered and the original call is placed on hold.
- Press 📞 to access the new call.
  Press 📩 or the Answer soft key.
  The incoming call is answered and the original call is placed on hold.

**Ending Calls**

To end a call:

Do one of the following:

- If you are using the handset, press the EndCall soft key or hang up the handset.
- If you are using the headset, press the EndCall soft key.
- If you are using the speakerphone, press 🎤 or the EndCall soft key.

**Note**

When a call is placed on hold, you cannot press ✖️ to end it. You should press the Resume soft key to resume the call, and then press ✖️ to end it.

**Redialing Numbers**

To redial the last dialed number from your phone:

1. Press 📞 twice.
   A call to your last dialed number is attempted.

To redial a previously dialed number from your phone:

1. Press 📞 when the phone is idle.
2. Press ◀️ or ▶️ to select the desired entry from the placed calls list, and then press ◀️ or the Send soft key.

**Recent Call In Dialing**

To view the placed calls list when the phone is on the pre-dialing screen, you should enable recent call in dialing in advance.

To enable recent call in dialing via web user interface:

1. Click on Directory > Setting.
2. Select **Enabled** from the pull-down list of **Recent Call In Dialing**.

![Recent Call In Dialing Setting](image)

3. Click **Confirm** to accept the change.

**Note**

Recent call in dialing is configurable via web user interface only.

**To view placed calls list when the phone is on the pre-dialing screen:**

1. Pick up the handset, press the speakerphone or press the line key.
   The LCD screen displays the placed calls list.

   ![Placed Calls List](image)

**Auto Answer**

You can use auto answer feature to automatically answer an incoming call on a line. Auto answer is configurable on a per-line basis.

**To configure auto answer via phone user interface:**

1. Press **Menu** -> **Features** -> **Auto Answer**.
2. Press **<** or **>** or the **Switch** soft key to select the desired account from the **Line ID** field.
3. Press \( \text{ or } \), or the **Switch** soft key to select **Enabled** from the **Status** field.

![Auto Answer](image)

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

   The **AA** icon appears on the LCD screen.

   Auto answer is configurable via web user interface at the path **Account->Basic**.

**Note**

Auto answer is only applicable when there is no other call in progress on the phone.

### Auto Redial

You can enable auto redial to automatically redial a phone number when the called party is busy. You can also configure the number of auto redial attempts and the time to wait between redial attempts.

**To configure auto redial via phone user interface:**

1. Press **Menu->Features->Auto Redial**.
2. Press \( \), or the **Switch** soft key to select **Enabled** from the **Auto Redial** field.

![Auto Redial](image)

3. Enter the desired time (in seconds) in the **Redial Interval** field.

   The default time interval is 10 seconds.

4. Enter the desired number of redial attempts in the **Redial Times** field.

   The default value is 10.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

   Auto redial is configurable via web user interface at the path **Features->General Information**.

**To use auto redial:**

When the called party is busy, the LCD screen prompts the following:
1. Press the **OK** soft key to activate auto redial.
   
The LCD screen prompts the following:

![Call Finish](image1)

2. Wait for the designated period of time or press the **OK** soft key to redial the phone number.
   
The phone will retry as many times as configured until the called party is idle.

### Call Completion

You can use call completion to notify the caller who failed to reach a desired party when the party becomes available to receive a call.

**To configure call completion via phone user interface:**

1. Press **Menu** > **Features** > **Call Completion**.
2. Press ← or →, or the **Switch** soft key to select **Enabled** from the **Call Completion** field.

![Call Completion](image2)

3. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call completion is configurable via web user interface at the path **Features** > **General Information**.

**To use call completion:**

When the called party is busy, the following prompt will appear on the LCD screen of the phone:

![Call Completion](image3)

1. Press the **OK** soft key, the phone returns to the idle screen and call completion is activated.
When the called party becomes idle, the following prompt appears on the LCD screen of the phone:

![Call Completion Prompt](image)

2. Press the **OK** soft key to redial the number.

**Note**  Call completion is not available on all servers. For more information, contact your system administrator.

### ReCall

You can press a recall key to place a call back to the last incoming call.

**To configure a recall key via phone user interface:**

1. Press **Menu -› Features -› DSS Keys**.
2. Select the desired DSS key.
3. Press **4** or **6**, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press **6** or **8**, or the **Switch** soft key to select **ReCall** from the **Key Type** field.

![DSS Key Configuration](image)

5. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Recall key is configurable via web user interface at the path **DSSKey -› Line Key**.

### Call Mute

You can mute the microphone of the active audio device during an active call so that the other party cannot hear you. Call mute applies to all modes (Handset, Headset and Speakerphone).

**To mute a call:**

1. Press **mute** during an active call.
The LCD screen indicates that the call is now muted. The mute key LED illuminates solid red when the call is muted.

To un-mute a call:
1. Press again to un-mute the call.
   The mute key LED goes out.

## Call Hold/Resume

You can place an active call on hold. Only one active call can be in progress at any time. Other calls can be made and received while placing the original call on hold. When you place a call on hold, your IP PBX may play music to the other party while waiting.

To place a call on hold:
1. Press the Hold soft key during a call.
   The line key LED flashes green. The LCD screen indicates that the call is on hold.

**Note**
The phone will beep softly every 30 seconds to remind you that you still have a call on hold.

To resume a held call:
1. Press the Resume soft key.

### Multiple Calls on Hold:

If multiple calls are placed on hold, do one of the following:

- Press or to switch between the calls, and then press the Resume soft key to retrieve the desired call.

- Press the corresponding line key to retrieve the call.

If more than one call is placed on hold, a numbered prompt appears on the LCD screen, for example “2/3”, indicating that this is the second call out of three calls.
Do Not Disturb (DND)

You can use DND to reject incoming calls automatically on the phone. The prompt message "n New Missed Call(s)" ("n" indicates the number of missed calls) will appear on the LCD screen, and callers will receive a busy message. All calls you receive while DND is enabled are logged to your missed calls list.

Note

The prompt message will display only if Missed Call Log for the line is enabled. Missed call log is configurable via web user interface at the path Account->Basic.

Do not disturb is local to the phone, and may be overridden by the server settings. For more information, contact your system administrator.

You can enable/disable DND for the phone system, or you can customize DND for each or all accounts. Two DND modes:

- **Phone** (default): DND is effective for the phone system.
- **Custom**: DND can be configured for each or all accounts

You can receive incoming calls from authorized numbers when DND is enabled.

To configure the DND mode via web user interface:

1. Click on Features->Forward & DND.
2. In the DND block, mark the desired radio box in the Mode field.

3. Click Confirm to accept the change.

**Note**
DND mode is configurable via web user interface only.

**To activate DND in phone mode:**

1. Press the DND soft key when the phone is idle. The DND icon on the status bar indicates that DND is enabled.

   Incoming calls will be rejected automatically and "n New Missed Call(s)" ("n" indicates the number of missed calls) will prompt on the LCD screen.

**Note**
When DND and busy forward are enabled in phone mode, calls will be sent to the configured destination number. For more information on busy forward, refer to [Call Forward](#) on page 85.
To activate DND in custom mode for a specific account:

1. Press the DND soft key when the phone is idle.
   The LCD screen displays a list of accounts registered on the phone.

   ![Custom DND Screen]

2. Press \( \uparrow \) or \( \downarrow \) to select the desired account and then press the Enter soft key.
3. Press \( \uparrow \) or \( \downarrow \), or the Switch soft key to select Enabled from the DND Enable field.

   ![Custom DND Screen with Enabled Option]

4. Press the Save soft key to accept the change.
   If you activate DND for the default account, the associated line icon will change to \( \bullet \), and the DND icon will appear on the status bar.
   If you activate DND for the non-default account, only the DND icon will appear on the status bar.
   Incoming calls on the specific line will be rejected automatically, and the LCD screen prompts “\( \text{n New Missed Call(s)} \)” (“n” indicates the number of missed calls).

   ![Incoming Call Rejection]

   **Note**: When DND and busy forward are both enabled for a specific account, calls to the specific account will be sent to the configured destination number. For more information on call forward, refer to Call Forward on page 85.

To activate DND in custom mode for all accounts:

1. Press the DND soft key when the phone is idle.
   The LCD screen displays a list of accounts registered on the phone.

   ![Custom DND Screen for All Accounts]

2. Press the All On soft key to activate DND for all accounts.
3. Press the Save soft key to accept the change.

The DND icon appears on the status bar, and all line icons change to 📲. Incoming calls will be rejected automatically and "n New Missed Call(s)" ("n" indicates the number of missed calls) will be prompted on the LCD screen.

To configure the DND authorized numbers via web user interface:

1. Click on Features -> Forward & DND.
2. Select Enabled from the pull-down list of DND Emergency.
3. Enter the numbers in the DND Authorized Numbers field.

For multiple numbers, enter a comma between every two numbers.

4. Click Confirm to accept the change.

When DND is enabled on the phone, the phone can still receive incoming calls from the numbers specified in the DND Authorized Numbers field.

Note

DND authorized number is configurable via web user interface only.

When the phone receives a voice mail, a prompt window will pop up by default, if you want to disable the feature, contact your system administrator for more information.
Basic Call Features

Call Forward

You can configure your phone to forward incoming calls to another party through static forwarding. You can also forward incoming calls while your phone is ringing; refer to the dynamic forwarding.

Static Forwarding

Three types of static forwarding:

- **Always Forward**: Incoming calls are immediately forwarded.
- **Busy Forward**: Incoming calls are immediately forwarded if the phone is busy.
- **No Answer Forward**: Incoming calls are forwarded if not answered after a period of time.

You can enable/disable call forward for the phone, or you can customize call forward for each or all accounts. Two call forward modes:

- **Phone** (default): Call forward is effective for the phone system.
- **Custom**: Call forward can be configured for each or all accounts.

To configure the call forward mode via web user interface:

1. Click on **Features** -> **Forward & DND**.
2. In the **Forward** block, mark the desired radio box in the **Mode** field.
3. Click Confirm to accept the change.

**Note**

Call forward mode is configurable via web user interface only.

To enable call forward in phone mode:

1. Press Menu -> Features -> Call Forward.
2. Press ( or ) to select the desired forwarding type, and then press the Enter soft key.
3. Depending on your selection:
   a.) If you select **Always Forward**:
      1) Press ( or ), or the Switch soft key to select Enabled from the Always Forward field.
      2) Enter the destination number you want to forward all incoming calls to in the Forward to field.
      3) (Optional.) Enter the always forward on code or off code respectively in the On Code or Off Code field.
   b.) If you select **Busy Forward**:
      1) Press ( or ), or the Switch soft key to select Enabled from the Busy Forward field.
      2) Enter the destination number you want to forward all incoming calls to when the phone is busy in the Forward to field.
      3) (Optional.) Enter the busy forward on code or off code respectively in the On Code or Off Code field.
   c.) If you select **No Answer Forward**:
      1) Press ( or ), or the Switch soft key to select Enabled from the No Answer Forward field.
2) Enter the destination number you want to forward all unanswered incoming calls to in the **Forward to** field.

3) Press  or , or the **Switch** soft key to select the ring time to wait before forwarding from the **After Ring Time** field.
   The default ring time is 12 seconds.

4) (Optional.) Enter the no answer forward on code or off code respectively in the **On Code** or **Off Code** field.

4. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.
   The icon on the status bar indicates that the call forward is enabled.

**To enable call forward in custom mode:**

1. Press **Menu**->**Features**->**Call Forward**.
2. Press  or  to select the desired account, and then press the **Enter** soft key.

   ![Custom Mode Menu](image)

3. Press  or  to select the desired forwarding type, and then press the **Enter** soft key.

4. Depending on your selection:
   a.) If you select **Always Forward**, you can enable it for a specific account.
      1) Press  or , or the **Switch** soft key to select **Enabled** from the **Always Forward** field.

      ![Always Forward Menu](image)

      2) Enter the destination number you want to forward all incoming calls to in the **Forward to** field.

      3) (Optional.) Enter the always forward on code or off code respectively in the **On Code** or **Off Code** field.

   You can also enable always forward for all accounts. After always forward was enabled for a specific account, do the following:
   1) Press  or  to highlight the **Always Forward** field.
   2) Press the **All Lines** soft key.
The LCD screen prompts “Copy to all lines?".

3) Press the OK soft key to accept the change or the Cancel soft key to cancel.

b.) If you select Busy Forward, you can enable it for a specific account.

1) Press ← or →, or the Switch soft key to select Enabled from the Busy Forward field.

2) Enter the destination number you want to forward incoming calls to when the phone is busy in the Forward to field.

3) (Optional.) Enter the busy forward on code or off code respectively in the On Code or Off Code field.

You can also enable busy forward for all accounts. After busy forward was enabled for a specific account, do the following:

1) Press ← or → to highlight the Busy Forward field.

2) Press the All Lines soft key.

The LCD screen prompts “Copy to all lines?”.  

3) Press the OK soft key to accept the change or the Cancel soft key to cancel.

c.) If you select No Answer Forward, you can enable it for a specific account.

1) Press ← or →, or the Switch soft key to select Enabled from the No Answer Forward field.

2) Enter the destination number you want to forward all unanswered incoming calls to in the Forward to field.

3) Press ← or →, or the Switch soft key to select the ring time to wait
before forwarding from the **After Ring Time** field.

The default ring time is 12 seconds.

4) **(Optional.)** Enter the no answer forward on code or off code respectively in the **On Code** or **Off Code** field.

You can also enable no answer forward for all accounts. After no answer forward was enabled for a specific account, do the following:

1) Press ↑ or ↓ to highlight the **No Answer Forward** field.

2) Press the **All Lines** soft key.

The LCD screen prompts “Copy to all lines?”.

3) Press the **OK** soft key to accept the change or the **Cancel** soft key to cancel.

5. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

If you activate call forward for the default account, the associated line icon will change to ✂️, and the ✂️ icon will appear on the status bar.

If you activate call forward for the non-default account, only the associated line icon will change to ✂️.

Call forward is configurable via web user interface at the path **Features->Forward & DND**.

### Note

You can also enter the SIP URI or IP address in the **Forward to** field. For more information on using the SIP URI or IP address, refer to **Placing Calls** on page 72.

Call forward is local to the phone, and may be overridden by the server settings. Call forward on code or off code may be different between servers. For more information, contact your system administrator.

**To configure the forward authorized numbers via web user interface:**

1. Click on **Features->Forward & DND**.

2. Select **Enabled** from the pull-down list of **Forward Emergency**.

3. Enter the numbers in the **Forward Authorized Numbers** field.
For multiple numbers, enter a comma between every two numbers.

4. Click **Confirm** to accept the change.
   
   When call forward is enabled on the phone, the phone cannot forward incoming calls from the numbers specified in the **Forward Authorized Numbers** field.

**Note**

Forward authorized number is configurable via web user interface only.

**To disable call forward in phone mode:**

1. Press **Menu -> Features -> Call Forward**.
2. Press ▲ or ▼ to select the desired forwarding type and then press the **Enter** soft key.
3. Press ▼ or ▲, or the **Switch** soft key to select **Disabled** to disable the call forward.
4. Press the **Save** soft key to accept the change.

**To disable call forward in custom mode for a specific account:**

1. Press **Menu -> Features -> Call Forward**.
2. Press ▼ or ▲ to select the desired account and then press the **Enter** soft key.
3. Press ▼ or ▲ to select the desired forwarding type and then press the **Enter** soft key.
4. Press ▼ or ▲, or the **Switch** soft key to select **Disabled** to disable the call forward.
5. Press the **Save** soft key to accept the change.
**Dynamic Forwarding**

To forward an incoming call to another party:

1. When the phone is ringing, press the FWD soft key.
2. Enter the number you want to forward the incoming call to.

3. Press OK, #, or the Send soft key.

   The LCD screen prompts a call forward message.

**Note**

When the phone forwards a call, a prompt window will pop up by default, if you want to disable the feature, contact your system administrator for more information.

**Call Transfer**

You can transfer a call to another party in one of three ways:

- **Blind Transfer**: Transfer a call directly to another party without consulting.
- **Semi-Attended Transfer**: Transfer a call when the target phone is ringing.
- **Attended Transfer**: Transfer a call with prior consulting.

**To perform a blind transfer:**

1. Press the Tran soft key during a call.
2. Enter the number you want to transfer the call to.

3. Press the Tran soft key to complete the transfer.

   Then the call is connected to the number to which you are transferring.

**To perform a semi-attended transfer:**

1. Press the Tran soft key during a call.
2. Do one of the following:
   - Press the Directory soft key, and then select Local Directory. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 30 for more information).
- Press the Directory soft key, and then select History. Select the desired list and press (or ▼) to select the entry (Directory should be configured in advance. Refer to Directory on page 30 for more information).

- Press the Directory soft key, and then select Remote Phone Book. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 30 and Remote Phone Book on page 42 for more information).

3. Press (OK) or (7*) to dial out.
4. Press the Tran soft key to complete the transfer when receiving ringback.

To perform an attended transfer:

1. Press the Tran soft key during a call.
2. Do one of the following:
   - Enter the number you want to transfer the call to.
   - Press the Directory soft key, and then select Local Directory. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 30 for more information).
   - Press the Directory soft key, and then select History. Select the desired list and press (▲) or (▼) to select the entry (Directory should be configured in advance. Refer to Directory on page 30 for more information).
   - Press the Directory soft key, and then select Remote Phone Book. Select the desired group and search for the contact (Directory should be configured in advance. Refer to Directory on page 30 and Remote Phone Book on page 42 for more information).
3. Press (OK) or (7*) to dial out.
4. After the party answers the call, press the Tran soft key to complete the transfer.

If you are using a handset, the transfer can be completed by hanging up the handset. You can cancel the transfer before the call is connected by pressing the Cancel soft key.

### Call Waiting

You can enable or disable call waiting on the phone. If call waiting is enabled, you can receive another call while there is already an active call on the phone. Otherwise, another incoming call is automatically rejected by the phone with a busy message when there is an active call on the phone. You can also enable or disable the phone to play a warning tone when receiving another call.

To configure call waiting via phone user interface:

1. Press Menu -> Features -> Call Waiting.
2. Press (▲) or (▼), or the Switch soft key to select Enabled from the Call Waiting
3. Press  or  , or the Switch soft key to select Enabled from the Play Tone field.

4. (Optional.) Enter the call waiting on code or off code respectively in the On Code or Off Code field.

5. Press the Save soft key to accept the change or the Back soft key to cancel.

Call waiting is configurable via web user interface at the path Features->General Information.

Conference

You can create a conference with other two parties using the phone’s local conference. You can create a conference between an active call and a call on hold by pressing the Conference soft key. The SIP-T42G IP phone also supports network conference.

Note

Network conference is not available on all servers. For more information, contact your system administrator.

Local Conference

The SIP-T42G IP phone supports up to 3 parties (including yourself) in a conference call. This is the default method of conference called Local Conference.

To set up a local conference call:

1. Place a call to the first party.

2. When the first party answers the call, press the Conference soft key to place a new call.

   The active call is placed on hold.

3. Enter the number of the second party and press  ,  , or the Send soft key.

4. When the second party answers the call, press the Conference soft key again to join all parties in the conference.

You can press  or  to see all parties in the conference.
To join two calls in a conference:

1. Place two calls using two different accounts on the phone (for example, place the first call using account 1, and then place the second call using account 2).
2. Press ▲ or ▼ to select the call for conference and ensure that the call is active (for example, select the call on account 1).
3. Press the Conference soft key to join the two calls in the conference on account 1.

During the conference call, you can do the following actions:

- Press the Hold soft key to place the conference on hold.
- Press the Split soft key to split the conference call into two individual calls on hold.
- Press the Manage soft key, and then press ▼ or ▲ to select the desired party:
  - Press the Far Mute soft key to forbid the party from speaking. The muted party can hear everyone, but no one can hear the muted party.
  - Press the Remove soft key to remove the party from the conference call.
  - Press the New Call soft key to place a new call.
  - Press the Back soft key to return to the previous screen.
- Press ◐ to mute the conference call.
- Press the EndCall soft key to drop the conference call.

**Network Conference**

You can use network conference on the SIP-T42G IP phone to conduct a conference with multiple participants.

This feature allows you to perform the following:

- Join two calls together into a conference call.
- Invite another party into an active conference call.

To use this feature, contact your system administrator for the network conference URI in advance.

To configure network conference via web user interface:

1. Click on Account->Advanced.
2. Select Network Conference from the pull-down list of Conference Type.
3. Enter the conference URI (e.g., conference@example.com) in the Conference URI field.

4. Click Confirm to accept the change.

**Note**

Network conference is configurable via web user interface only.

**To set up a network conference call:**

1. Place a call to the first party.
2. Press the Conference soft key to place a new call.
   The active call is placed on hold.
3. Enter the number of the second party and press 🎤, #, or the Send soft key.
4. When the second party answers the call, press the Conference soft key to add the second party to the conference.
5. Press the Conference soft key to place a new call.
   The conference is placed on hold.
6. Enter the number of the new party and then press 🎤, #, or the Send soft key.
7. When the new party answers the call, press the Conference soft key to add the new party to the conference.
8. Repeat steps 5 to 7 until you have added all intended parties.

The procedures to set up a network conference call on specific servers may be different from that introduced above. Contact your system administrator for more information.
Call Park

You can use call park feature to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room). You can park an active call by pressing the call park key on the phone. If the call is parked successfully, the response is either a voice prompt confirming that the call was parked, or a visible prompt on the LCD screen.

**Note**
Call park is not available on all servers. Contact your system administrator for more information.

**To configure a call park key via phone user interface:**

1. Press **Menu** -> **Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press or , or the **Switch** soft key to select **Call Park** from the **Key Type** field.

![Call Park Key Configuration](image)

5. Press or , or the **Switch** soft key to select the desired line from the **Account ID** field.
6. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
7. Enter the call park code in the **Value** field.
8. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Call park key is configurable via web user interface at the path **DSSKey** -> **Line Key**.

**To use call park:**

1. User on phone A places a call to phone B.
2. User on phone A wants to take the call in a conference room for privacy, and so presses the call park key on phone A.
3. User on phone A walks to an available conference room where the phone is designated as phone C. The user dials the call park retrieve code to retrieve the parked call.

   The system establishes call between phone C and B.

**Note**
The call park code and call park retrieve code are predefined on the system server. Contact your system administrator for more information.

If the parked call is not retrieved within a period of time assigned by the system, the phone performing call park will receive a call back.
Call Pickup

You can use call pickup to answer someone else’s incoming call on your phone. The SIP-T42G IP phone supports directed call pickup and group call pickup. Directed call pickup is used for picking up a call that is ringing at a target phone number. Group call pickup is used for picking up a call that is ringing at any phone number in a certain group. The pickup group should be predefined, contact your system administrator for more information.

You can pick up an incoming call by using the DPickup/GPickup soft key. To use call pickup, you need to configure the call pickup code beforehand on a global or per-line basis via web user interface.

Note

If there are many incoming calls at the same time, pressing the GPickup soft key on the phone will pick up the call that rings first.

Directed Call Pickup

To enable directed call pickup and configure the directed call pickup code on a global basis via web user interface:

1. Click on Features -> Call Pickup.
2. Select Enabled from the pull-down list of Directed Call Pickup.
3. Enter the directed call pickup code in the Directed Call Pickup Code field.
4. Click Confirm to accept the change.

To configure the directed call pickup code on a per-line basis via web user interface:

1. Click on Account -> Advanced.
2. Select the desired account from the pull-down list of Account.
3. Enter the directed call pickup code in the **Directed Call Pickup Code** field.

4. Click **Confirm** to accept the change.

**To pick up a call directly:**

1. Pick up the handset, press the speakerphone key or press the line key (You may need to press the **More** soft key to see the **DPickup** soft key).

   The **DPickup** soft key appears on the LCD screen.

   1. Press the **DPickup** soft key on your phone when the target phone receives an incoming call.
   2. Enter the phone number which is receiving an incoming call.
   3. Press the **DPickup** soft key again.

      The call is answered on your phone.

You can also configure a DSS key as direct pickup key via phone user interface or web user interface. Once configured, you can pick up a call by pressing the directed pickup key directly.
Group Call Pickup

To enable group call pickup and configure the group call pickup code on a global basis via web user interface:

1. Click on Features -> Call Pickup.
2. Select Enabled from the pull-down list of Group Call Pickup.
3. Enter the group call pickup code in the Group Call Pickup Code field.
4. Click Confirm to accept the change.

To configure the group call pickup code on a per-line basis via web user interface:

1. Click on Account -> Advanced.
2. Select the desired account from the pull-down list of Account.
3. Enter the group call pickup code in the Group Call Pickup Code field.
4. Click Confirm to accept the change.
To pick up a call in the group:

1. Pick up the handset, press the speakerphone key or press the line key (You may need to press the More soft key to see the GPickup soft key).

   The GPickup soft key appears on the LCD screen.

2. Press the GPickup soft key on your phone when a phone in the group receives an incoming call.

   The call is answered on your phone.

You can also configure a DSS key as group pickup key via phone user interface or web user interface. Once configured, you can pick up a call by pressing the group pickup key directly.

**Note**

The directed call pickup code and group call pickup code are predefined on the system server. Contact your system administrator for more information.

The call pickup code configured on a per-line basis takes precedence over that configured on a global basis.

### Anonymous Call

You can use anonymous call to block your identify and phone number from appearing to the called party when you call someone. For example, you want to call to consult some services, but don’t want to be harassed. Anonymous call is configurable on a per-line basis. You can also configure the phone to send anonymous call on/off code to the server to activate/deactivate anonymous call on the server side.

**Note**

Anonymous call is not available on all servers. Contact your system administrator for the anonymous call on code and off code.

**To configure anonymous call via phone user interface:**

1. Press **Menu** > **Features** > **Anonymous Call**.

2. Press ( or ), or the **Switch** soft key to select the desired line from the **Line ID** field.
3. Press or , or the Switch soft key to select Enabled from the Local Anony field.

4. (Optional.) Press or , or the Switch soft key to select the desired value from the Send Anony Code field.

The phone will send the configured on code or off code depending on your selection when you enable or disable anonymous call feature on the phone.

5. (Optional.) Enter the anonymous call on code and off code respectively in the On Code and Off Code field.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

Anonymous call is configurable via web user interface at the path Account -> Basic.

To place an anonymous call:

1. Using the specific line on the phone to place a call to phone B.

The LCD screen of phone B prompts an incoming call from anonymity.

Anonymous Call Rejection

You can use anonymous call rejection to reject incoming calls from anonymous callers. Anonymous call rejection automatically rejects incoming calls from callers who deliberately block their identities and numbers from being displayed. Anonymous call rejection is configurable on a per-line basis. You can also configure the phone to send anonymous call rejection on/off code to the server to activate/deactivate anonymous call rejection on the server side.

To configure anonymous call rejection via phone user interface:

1. Press Menu -> Features -> Anonymous Call.

2. Press or , or the Switch soft key to select the desired line from the Account ID field.

3. Press or to scroll to the Anony Rejection field.
4. Press \( \text{ or } \text{ } \), or the Switch soft key to select Enabled from the Anony Rejection field.

5. (Optional.) Press \( \text{ or } \text{ } \), or the Switch soft key to select the desired value from the Send Reject Code field.

The phone will send the configured on code or off code depending on your selection when you enable or disable anonymous call rejection feature on the phone.

6. (Optional.) Enter the anonymous call rejection on code and off code respectively in the Reject On Code and Reject Off Code field.

7. Press the Save soft key to accept the change or the Back soft key to cancel.

Anonymous call rejection is configurable via web user interface at the path Account->Basic.
This chapter provides operating instructions for the advanced features of the SIP-T42G IP phone. Topics include:

- Busy Lamp Field (BLF)
- BLF List
- Call Recording
- Hot Deskig
- Intercom
- Multicast Paging
- Music on Hold
- Automatic Call Distribution (ACD)
- Shared Call Appearance (SCA)
- Bridged Line Appearance (BLA)
- Messages

If you require additional information or assistance with your new phone, contact your system administrator.

**Busy Lamp Field (BLF)**

You can use BLF to monitor a specific line for status changes on the phone. For example, you can configure a BLF key on the phone to monitor the status of a friend’s line (busy or idle). The BLF key LED illuminates solid red when the friend’s line is in use. For more information on BLF key LED indicators, refer to LED Instructions on page 4.

You can press a BLF key to dial out the monitored phone number when the monitored line is idle. You can receive a visual or/and an audio alert (if enabled), and also pick up calls that are received on the monitored line. For more information, contact your system administrator.

**To configure a BLF key via phone user interface:**

1. Press **Menu** -> **Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press \( \text{or } \) or the \textit{Switch} soft key to select BLF from the \textit{Type} field.

![BLF Key Configuration](image)

4. Press \( \text{or } \) or the \textit{Switch} soft key to select the desired line from the \textit{Account ID} field.

5. (Optional.) Enter a string that will appear on the LCD screen in the \textit{Label} field.

6. Enter the phone number or extension you want to monitor in the \textit{Value} field.

7. (Optional.) Enter the pickup code in the \textit{Extension} field.

8. Press the \textit{Save} soft key to accept the change or the \textit{Back} soft key to cancel.

BLF key is configurable via web user interface at the path \texttt{DSSKey\textgreater Line Key}.

You can enable audio alert feature for BLF pickup on the phone. This allows the monitoring phone to play a warning tone when the monitored line receives an incoming call. You can also enable visual alert feature for BLF pickup on the phone. This allows the LCD screen of the monitoring phone to display the caller ID when the monitored line receives an incoming call.

To enable visual and audio alert features via web user interface:

1. Click on \texttt{Features\textgreater Call Pickup}.

2. Select \texttt{Enabled} from the pull-down list of \texttt{Visual Alert for BLF Pickup}.

3. Select \texttt{Enabled} from the pull-down list of \texttt{Audio Alert for BLF Pickup}.

4. Click \texttt{Confirm} to accept the change.

\textbf{Note}  
Visual and audio alert features are configurable via web user interface only.

When the monitored line receives an incoming call, the following occurs on your phone:

- The phone plays a warning tone (if enabled).
The BLF key LED flashes red.

The caller ID appears on the LCD screen (if enabled).

In the following figure, the LCD screen shows an incoming call from 1006 on the monitored line.

<table>
<thead>
<tr>
<th>Calls for Pickup</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1001 &lt;-&gt; 1006</td>
</tr>
</tbody>
</table>

```
DPickup  Send  NewCall  Cancel
```

**Note**

If your phone is locked and the type of the phone lock is configured as **Function Keys** or **All keys**, you cannot use the DPickup, Send, NewCall and Cancel soft keys until unlocked.

When there is an active call on the IP phone, you can transfer the active call to the monitored phone number directly by pressing the BLF key. The phone handles the active call differently depending on the transfer mode on DSS key. For more information on the transfer mode on DSS key, refer to **Transfer** in DSS Keys section on page 56.

**BLF List**

You can use the BLF List feature to monitor a list of users defined by your system administrator. For example, your system administrator enables BLF List, and creates a BLF List URI (e.g., BLFList@example.com) including a list of user1, user2 on the server.

The BLF List keys on the IP phone can present the status of user1 and user2. The key LEDs illuminate either flashing or solid depending on the status of those users. For more BLF List key LED indicators, refer to **LED Instructions** on page 4.

You can use the BLF List keys in the following ways:

- When the monitored user is idle, press the BLF list key to dial out the phone number.
- When there is already an active call on the IP phone, you can transfer the active call to the monitored user by pressing the BLF List key. The phone handles the active call differently depending on the transfer mode on DSS key. For more information on the transfer mode on DSS key, refer to **Transfer** in DSS Keys section on page 56.
- When the monitored user receives an incoming call, press the BLF list key to pick up the call directly. Before picking up an incoming call, ensure that the directed pickup code has been configured in advance. If the directed pickup code is not configured, the phone will place a call to the monitored user instead of picking up the incoming call of the monitored user when you press the BLF List key.
- When there is a conversation on the monitored user, press the BLF list key to barge in and set up a conference call. Before barging in an active call, ensure that the barge-in code has been configured in advance. If the BLF list barge in code is not
configured, the phone will place a call to the monitored user instead of barging in an active call of the monitored user when you press the BLF List key.

- When a call is being parked against the monitored phone, press the BLF List key to retrieve the parked call from the monitored user. Before retrieving the parked call, ensure that the BLF List Retrieve call parked Code has been configured in advance. If the code is not configured, the phone will place a call to the monitored user instead of retrieving the parked call when you press the BLF List key.

To configure BLF List settings via web user interface:

1. Click on **Account > Advanced**.
2. Select the desired account from the pull-down list of Account.
3. Enter the BLF List URI in the **BLF List URI** field.
4. (Optional.) Enter the directed pickup code in the **BLF List Pickup Code** field.
5. (Optional.) Enter the barge-in code in the **BLF List Barge In Code** field.
6. (Optional.) Enter the call park retrieve code in the **BLF List Retrieve Call Parked Code** field.

![Image of Yealink User Interface](image)

7. Click **Confirm** to accept the change.

**Note**

For more information on BLF List URI/BLF List Pickup Code/BLF List Barge In Code/BLF List Retrieve Call Parked Code, contact your system administrator.

According to the response message from the server, the IP phone will automatically configure the BLF List keys beginning from the first unused line key. Once any line key is seized, the IP phone will skip to configure the next line key.
You can receive a visual or/and an audio alert (if enabled) on your phone when the monitored user receives an incoming call. For more information, refer to Busy Lamp Field (BLF) on page 103.

**Note**
The pickup code is used in the following order of preference: BLF List Pickup Code (Account->Advanced)>Directed Call Pickup Code (Account->Advanced)>Directed Call Pickup Code (Features->Call Pickup). If all of them are not configured, pressing the BLF List key will directly call the monitored user when he/she receives an incoming call. For more information about pickup Code, refer to Call Pickup on page 97.

## Call Recording

You can record calls by pressing a record key on the phone. The SPT-42G IP phone supports record and URL record.

Two ways of call recording:

- **Record**: The phone sends a SIP INFO message containing a specific header “Record: on/off” to trigger a recording.
- **URL Record**: The phone sends an HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

**Note**
Call record is not available on all servers. Contact your system administrator for more information.

To configure a record key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press or , or the Switch soft key to select **Key Event** from the **Type** field.
4. Press or , or the Switch soft key to select **Record** from the **Key Type** field.
5. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

To configure a URL record key via phone user interface:

1. Press **Menu->Features->DSS Keys**.
2. Select the desired DSS key.
3. Press  or , or the Switch soft key to select URL Record from the Type field.

4. (Optional.) Enter a string that will appear on the LCD screen in the Label field.

5. Enter the URL (e.g., http://10.1.2.224/phonerecording.cgi) in the Value field.

6. Press the Save soft key to accept the change or the Back soft key to cancel.

Record and URL Record keys are configurable via web user interface at the path DSSKey- >Line Key.

The Record and URL Record keys control the recording function, and are available:

- During an active call
- When calls are on hold or mute
- During a blind or attended transfer
- During a conference call
- When the phone prompts you to answer an incoming call

The Record and URL Record keys are not available when:

- There are no connected calls on your phone
- You place a new call

To record a call:

1. Press the Record or URL Record key during a call.
   
   If the recording starts successfully, the recording icon will appear on the LCD screen and the Record or URL Record key LED will flash green.

2. Press the Record or URL Record key again to stop recording.
   
   The recording icon disappears from the LCD screen and the Record or URL Record key LED goes out.

Recording status indicators you need to know:

<table>
<thead>
<tr>
<th>Circumstance</th>
<th>Icons on the LCD screen</th>
</tr>
</thead>
<tbody>
<tr>
<td>A recording is started</td>
<td>🎤 appears on the LCD screen</td>
</tr>
<tr>
<td>A recording cannot be started</td>
<td>🎤 appears for 1 second</td>
</tr>
<tr>
<td>A recording cannot be stopped</td>
<td>🎤 appears for 1 second, then goes back</td>
</tr>
<tr>
<td>The recording box is full</td>
<td>🎤 appears for 1 second</td>
</tr>
<tr>
<td>The call cannot be recorded</td>
<td>🎤 appears for 1 second</td>
</tr>
</tbody>
</table>

You can listen to the recordings stored on your server system. For example, you can dial
an access code to listen to the recordings.

**Note**

The way in which you listen to the recordings may be different depending on the server. Contact your system administrator for more information.

**Hot Desking**

Hot desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for hot desking is cost reduction. This feature is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long, which means that actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking on the SIP-T42G IP phone to log out of existing accounts and then log in to a new account. As a result, many users can share the phone resource at different times. To use this feature, you need to configure a hot desking key in advance.

**Note**

Hot desking is not available on all servers. Contact your system administrator for more information.

**To configure a hot desking key via phone user interface:**

1. Press **Menu** > **Features** > **DSS Keys**.
2. Select the desired DSS key.
3. Press or , or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press or , or the **Switch** soft key to select **Hot Desking** from the **Key Type** field.
5. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Hot desking key is configurable via web user interface at the path **DSSKey** > **Line Key**.
To use hot desking:

1. Press the hot desking key when the phone is idle.
   The LCD screen prompts the following warning:

   ![Warning screen](image)

2. Press the OK soft key, registration configurations of all accounts on the phone will be cleared immediately.
   The login wizard will be displayed as below:

   ![Login wizard](image)

3. Enter the login information in each field.
4. Press the Save soft key to login or the Back soft key to cancel.

Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. You can press the intercom key to automatically connect with a preconfigured target extension for outgoing intercom calls, and the target extension will automatically answer incoming intercom calls by default.

Note

Intercom is not available on all servers. Contact your system administrator for more information.

Outgoing Intercom Calls

To configure an intercom key via phone user interface:

1. Press Menu->Features->DSS Keys.
2. Select the desired DSS key.
3. Press or , or the Switch soft key to select Intercom from the Type field.

   ![Key configuration](image)

4. Select the desired line from the Account ID field.
5. (Optional.) Enter the string that will appear on the LCD screen in the Label field.
6. Enter the target extension number in the Value field.
7. Press the Save soft key to accept the change or the Back soft key to cancel.

Intercom key is configurable via web user interface at the path DSSKey->Line Key.

Incoming Intercom Calls

The SIP-T42G IP phone supports automatically to answer an incoming intercom call by default. The phone automatically plays a warning tone when it receives an incoming intercom call. In addition, you can enable the phone to mute the microphone when it automatically answers an incoming intercom call. You can also enable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. The active call is then placed on hold.

Intercom features you need to know:

<table>
<thead>
<tr>
<th>Intercom Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accept Intercom</td>
<td>Enable or disable the IP phone to automatically answer an incoming intercom call.</td>
</tr>
<tr>
<td>Intercom Mute</td>
<td>Enable or disable the IP phone’s microphone for intercom calls.</td>
</tr>
<tr>
<td>Intercom Tone</td>
<td>Enable or disable the IP phone to play a warning tone when it receives an incoming intercom call.</td>
</tr>
<tr>
<td>Intercom Barge</td>
<td>Enable or disable the IP phone to automatically answer an incoming intercom call while there is already an active call on the phone.</td>
</tr>
</tbody>
</table>

Accept Intercom

You can enable or disable the phone to automatically answer an incoming intercom call. If Accept Intercom is enabled, the phone will automatically answer an incoming intercom call. If Accept Intercom is disabled, the phone will reject incoming intercom calls and send a busy message to the caller. Accept Intercom is enabled by default.

Note

Your administrator can set a period of delay time before the phone automatically answers intercom calls. Contact your system administrator for more information.

Intercom Mute

You can mute or un-mute the phone’s microphone for intercom calls automatically. If Intercom Mute is enabled, the microphone will be muted for intercom calls. If Intercom Mute is disabled, the microphone will work for intercom calls. Intercom Mute is disabled by default.
**Intercom Tone**

You can enable or disable the phone to play a warning tone when receiving an intercom call. If Intercom Tone is enabled, the phone will play a warning tone before answering the intercom call. If Intercom Tone is disabled, the phone will automatically answer the intercom call without warning. Intercom Tone is enabled by default.

**Intercom Barge**

You can enable or disable the phone to automatically answer an incoming intercom call while there is already an active call on the phone. If Intercom Barge is enabled, the phone will automatically answer the intercom call and place the active call on hold. If Intercom Barge is disabled, the phone will handle an incoming intercom call like a waiting call. Intercom Barge is disabled by default.

**Note**

To enable the phone to receive a new incoming call when it has an active call, make sure that call waiting feature is enabled on the phone in advance. For more information, refer to Call Waiting on page 92.

**To configure intercom features via phone user interface:**

1. Press Menu > Features > Intercom.
2. Make the desired changes.
3. Press the Save soft key to accept the change or the Back soft key to cancel.

These specific parameters are configurable via web user interface at the path Features > Intercom.

**Using Intercom**

**To place an intercom call when the target phone is idle:**

1. Press the intercom key when the phone is idle.
   
   The called destination plays a warning tone and automatically answers the call in the speakerphone mode by default.

2. To end the intercom call, press the intercom key again or the EndCall soft key.

**Multicast Paging**

You can use multicast paging to quickly and easily broadcast time sensitive announcements to users who are listening to a specific multicast group. You can
configure a multicast paging key or the paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address(es) without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address(es) without involving SIP signaling. You can specify up to 10 multicast listening addresses.

Sending RTP Stream

To configure a multicast paging key via phone user interface:

1. Press **Menu** -> **Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press ↑ or ↓, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press ↑ or ↓, or the **Switch** soft key to select **Multicast Paging** from the **Key Type** field.
5. (Optional.) Enter a string that will appear on the LCD screen in the **Label** field.
6. Enter the multicast IP address and port number (e.g., 224.5.6.20:10008) in the **Value** field.

   The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
7. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Multicast paging key is configurable via web user interface at the path **DSSKey** -> **Line Key**.

To configure a paging list key via phone user interface:

1. Press **Menu** -> **Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press ↑ or ↓, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press ↑ or ↓, or the **Switch** soft key to select **Paging List** from the **Key Type** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. Press the **Save** soft key to accept the change or the **Back** soft key to cancel.

Paging list key is configurable via web user interface at the path **DSSKey** -> **Line Key**.
To configure paging list via phone user interface:

1. Press the paging list key when the phone is idle.
2. Press ↑ or ↓ to select a desired paging group.
   The default tag is Empty if it is not configured before.

3. Press the Option soft key and then press the Edit soft key from the prompt list.
4. Enter the multicast IP address and port number (e.g., 224.5.6.20:10008) in the Address field.
   The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

5. Enter the group name in the Label field.
6. Press the Save soft key to accept the change.
7. Repeat the step 2-7, you can add more paging groups.

Paging list is configurable via web user interface at the path Directory > Multicast IP.

To delete paging group via phone user interface:

1. Press the paging list key when the phone is idle.
2. Press ↑ or ↓ to select a desired group.
3. Press the Option soft key and then select Delete from the prompt list.
   The LCD screen prompts “Delete selected paging group?”. 

4. Press the OK soft key to accept the change or the Cancel soft key to cancel.
If you want to delete all paging groups, you can press the Del All soft key.

You can also configure the phone to use a default codec for sending multicast RTP stream via web user interface.

To configure a default codec for multicast paging via web user interface:

1. Click on Features > General Information.
2. Select the desired codec from the pull-down list of Multicast Codec.
The default codec is G722.

3. Click **Confirm** to accept the change.

**Note**

If G722 codec is used for multicast paging, the LCD screen will display the icon to indicate that high definition voice is provided.

Default codec for multicast paging is configurable via web user interface only.

**Receiving RTP Stream**

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address(es) without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

**Paging Barge**

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.

Valid values in the Paging Barge field:

- **1 to 10**: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- **Disabled**: The voice call in progress will take precedence over all incoming paging calls.
Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

To configure multicast listening addresses via web user interface:

1. Click on Directory -> Multicast IP.
2. Enter the multicast IP address(es) and port number (e.g., 224.5.6.20:10008) which the phone listens to for incoming RTP multicast in the Listening Address field.
3. Enter the label in the Label field.
   Label will appear on the LCD screen when receiving the multicast RTP stream.
4. Click Confirm to accept the change.

Note

The priorities of listening addresses are predefined: 1 with the highest priority, 10 with the lowest.
Multicast listening addresses are configurable via web user interface only.

To configure paging barge and paging priority active features via web user interface:

1. Click on Directory -> Multicast IP.
2. Select the desired value from the pull-down list of Paging Barge.
3. Select the desired value from the pull-down list of Paging Priority Active.

4. Click Confirm to accept the change.

### Using Multicast Paging

To send RTP stream via a multicast paging key when the receiver’s phone is idle:

1. Press the multicast paging key when the phone is idle.
   - The phone sends RTP to a preconfigured multicast address (IP: Port).
   - Both the sender’s and receiver’s phones play a warning tone and the receiver automatically answers the multicast RTP session in the speakerphone mode.
   - The multicast paging key LED illuminates solid green.
   - The following figure shows a multicast RTP session on the phone:

   ![Multicast RTP Session](image)

2. To place the current multicast RTP session on hold, press the **Hold** soft key.
   - The sender’s phone places the multicast RTP session on hold and receiver’s phone releases the session.

3. To resume the held multicast RTP session, press the **Resume** soft key.
   - The multicast RTP session is established again.

4. To end the multicast RTP session, press the **EndCall** soft key.

**Note**
Multicast RTP is one way only from the sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.
To send RTP stream via a paging key list when the receiver’s phone is idle:

1. Press the paging list key when the phone is idle.
2. Press or to select the desired group.
3. Press or the Paging soft key to send RTP.
4. To place the current multicast RTP session on hold, press the Hold soft key.
   The sender’s phone places the multicast RTP session on hold and receiver’s phone releases the session.
5. To resume the held multicast RTP session, press the Resume soft key.
   The multicast RTP session is established again.
6. To end the multicast RTP session, press the EndCall soft key.

Music on Hold

Music on hold (MoH) is the business practice of playing recorded music to fill the silence that would be heard by the party placed on hold. To use this feature, you should specify a SIP URI pointing to a Music on Hold Server account. When a call is placed on hold, the phone will send a SIP INVITE message to the Music on Hold Server account. The Music on Hold Server account automatically answers the SIP INVITE messages and immediately plays audio from some source located anywhere (LAN, Internet) to the held party. Contact your system administrator for the SIP URI.

To configure music on hold server via web user interface:

1. Click on Account -> Advanced.
2. Select the desired account from the pull-down list of Account.
3. Enter the SIP URI (e.g., sip:moh@sip.com) in the **Music Server URI** field.

![Image of Yealink T42G phone interface with highlighted Music Server URI field]

4. Click **Confirm** to accept the change.

   When you have placed a call on hold, the held party can hear the music.

**Note**

For this feature to function, all involved parties cannot use encrypted RTP (SRTP).

Music on hold server is configurable via web user interface only.

---

**Automatic Call Distribution (ACD)**

ACD is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on the Sipt42G IP phone allows the ACD system to distribute large volumes of incoming calls to the registered ACD users. To use this feature, you should configure an ACD key in advance.

**Note**

Make sure ACD is enabled on your IP phone. For more information on enabling ACD, contact your system administrator.

**To configure an ACD key via phone user interface:**

1. Press **Menu** -> **Features** -> **DSS Keys**.
2. Select the desired DSS key.
3. Press \( \text{ or } \), or the \textbf{Switch} soft key to select \textbf{ACD} from the \textbf{Type} field.

![ACD Key Configuration](image)

4. (Optional.) Enter a string that will appear on the LCD screen in the \textbf{Label} field.

5. Press the \textbf{Save} soft key to accept the change or the \textbf{Back} soft key to cancel.

ACD key is configurable via web user interface at the path \texttt{DSSKey-Line Key}.

**To log into the ACD system:**

1. Press the ACD key when the phone is idle.

   The LCD screen prompts you the following information:
   - **User ID:** the identity used to log into the queue.
   - **Password:** the password used to log into the queue.

2. Press the \textbf{Login} soft key to log in.

   \textbf{Note} Contact your system administrator for the User ID and Password to access the ACD system.

After configuring an ACD key, you can press the ACD key to log into the ACD system. After logging in, you are ready to receive calls from the ACD system. You can press the ACD key to show your current ACD user status. You can press the \textbf{Avail/Unavail} soft key to change your ACD user status. ACD user status synchronizes on both IP phone and ACD system.

When you set the ACD user status to be available, the ACD key LED illuminates solid green, and then the server begins distributing calls to your phone. When you set the ACD user status to be unavailable, the ACD key LED flashes green, and then the server temporarily stops distributing calls to your phone. To log out of the ACD system, press the \textbf{Logout} soft key.

\textbf{Note} It is recommended you configure no more than one ACD key per phone. At any time, at most one ACD key can be in progress on your phone.

**Shared Call Appearance (SCA)**

You can use SCA feature to share an extension which can be registered on two or more
IP phones at the same time. The shared line is indicated by a different line icon.

In the following figure, the first line is private and the second line is shared:

![Image of phone interface with private and shared lines]

If two phones share a line, an incoming call to this extension will cause both phones to ring simultaneously. The incoming call can be answered on either phone but not both. This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss's extension on her phone. When there is an incoming call to the extension of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on the shared line can be placed on hold, barged in or retrieved from another shared phone.

### Configuring SCA Feature on the IP Phone

You can configure a primary account on the IP phone and other alternate accounts on the other IP phones. In a SCA Hybrid Key System scenario, you can automatically assign multiple DSS keys with Line type for a registered shared line on the phone (If auto linekeys feature is enabled). For example, party A, party B share the account 4603, phone A registers the primary account 4603 and assigns line key 1 and line key 2 for the account 4603, phone B registers the alternate account 4603_1 and assigns line key 1 and line key 2 for the account 4603_1, phone C registers the account 4604.

![Diagram of SCA feature configuration]

To configure the auto linekeys feature via web user interface:

1. Click on **Features** -> **General Information**.
2. Select **Enabled** from the pull-down list of **Auto LineKeys**.
   
   If **Auto LineKeys** is enabled, you can automatically assign multiple DSS keys with...
Line type for a registered shared line on the phone.

3. Click **Confirm** to accept the change.

To configure the shared line settings and the number of line key on phone A via web user interface:

1. Register the primary account 4603.
2. Click on **Advanced**, and then select **Shared Call Appearance** from the pull-down list of **Shared Line**.

3. Enter the desired number in the **Number of line key** field. This field appears only if **Auto Linekeys** is enabled. The default value is 1. In this example, the value is set to 2.

4. Click **Confirm** to accept the change. The phone A will automatically configure the line keys from the first unused DSS key, according to the configured number in the **Number of line key** field.

To configure the shared line settings and the number of line key on phone B via web user interface:

1. Register the alternate account 4603_1.
(Enter the primary account 4603 in the **Register Name** field.)

2. Click on **Advanced**, and then select **Shared Call Appearance** from the pull-down list of **Shared Line**.

3. Enter the desired number in the **Number of line key** field.
   
   This field appears only if **Auto Linekeys** is enabled.

   The default value is 1. In this example, the value is set to 2.
4. Click Confirm to accept the change.

The phone B will automatically configure the line keys from the first unused DSS key, according to the configured number in the **Number of line key** field.

**Configuring private hold soft key or private hold key**

Public hold allows any shared line to retrieve the held call. Private hold only allows the hold party to retrieve the held call. For example, you can retrieve the held call on either phone A or phone B when you place a call on public hold; you can retrieve the held call only on phone A when you place a call on private hold on phone A. By default, the private hold soft key isn’t displayed on the LCD screen. You need to configure either the private hold soft key or a private hold key before you place the call on private hold.

To configure the private hold soft key via web user interface:

1. Click on **Settings** > **Softkey Layout**.
2. Select **Enabled** from the pull-down list of **Custom Softkey**.
3. Select **On Talk** from the pull-down list of **Call States**.
4. Select **Private Hold** from the **Unselected Softkeys** column and then click .

The **Private Hold** appears in the **Selected Softkeys** column.

5. Click Confirm to accept the change.

To configure a private hold key via phone user interface:

1. Press **Menu** > **Features** > **DSS Keys**.
2. Select the desired DSS key.
3. Press 4 or 5, or the **Switch** soft key to select **Key Event** from the **Type** field.
4. Press ◀ or ▶, or the Switch soft key to select Private Hold from the Key Type field.

![Key Type](image)

5. (Optional.) Enter a string that will appear on the LCD screen in the Label field.
6. Press the Save soft key to accept the change or the Back soft key to cancel.

**Configuring call pull feature**

Call pull feature allows users to retrieve an existing call from another shared location that is in active or public hold status.

To configure the call pull feature access code via web user interface:

1. Click on Account->Advanced.
2. Select the desired account from the pull-down list of Account.
3. Enter the call pull feature access code (e.g., *11) in the Call Pull Feature Access Code field.

![Web Interface](image)

4. Click Confirm to accept the change.

The phone will dial out "*11" automatically when you press the CallPull soft key.

**Using SCA Feature on the IP Phone**

This section provides you with detailed information on using the SIPT42G IP phone in a
SCA Hybrid Key System scenario. In a SCA Hybrid Key System scenario, the status of the line key LED which associates with a shared line will change. For more information on line key LED indicators, refer to LED Instructions on page 4.

You can do the following using the IP phone in a SCA Hybrid Key System scenario:

- Placing calls
- Answering calls
- Placing a call on hold
- Retrieving a held call
- Barging in an active call
- Call Pull

**Placing Calls**

You can have one call or multiple calls on the shared line.

**To place a call on the shared line:**

Do one of the following:

- Enter the desired number using the keypad when the phone is idle. Press \[\text{OK}\], \[\#\], or the Send soft key. The phone will dial the entered number using the first line key.
- Press the line key when the phone is idle to enter the pre-dialing screen. Enter the desired number using the keypad and press \[\text{OK}\], \[\#\], or the Send soft key. The phone will dial the entered number using the selected line key.

**To place multiple calls on the shared line:**

You can have more than one call on the shared line. To place a new call when there is an active call on phone A, do one of the following on phone A:

- Press the Hold soft key. The original call is placed on hold. Press the NewCall soft key to enter the pre-dialing screen. Enter the desired number using the keypad. Press \[\text{OK}\], \[\#\], or the Send soft key. Phone A will dial the entered number using the line key 2 automatically.
- Press the line key. The original call is placed on hold. Enter the desired number using the keypad. Press \[\text{OK}\], \[\#\], or the Send soft key. Phone A will dial the entered number using the selected line key.
**Answering Calls**

You can have one call or multiple calls on the shared line. Incoming calls will be distributed evenly among the available line keys.

**To answer a call on the shared line:**

When an incoming call arrives on the shared line, the phone A and phone B will ring simultaneously, and the LED indicators of the line key 1 on both phone A and phone B will flash green. You can answer the incoming call on either phone A or phone B but not both.

Do one of the following on phone A or phone B:

- Press the line key 1, , or the **Answer** soft key on phone A.
  
  The LED indicator of the line key 1 on phone A will illuminate solid green and phone B will illuminate solid red.

- Press the line key 1, , or the **Answer** soft key on phone B.
  
  The LED indicators of the line key 1 on phone A will illuminate solid red and phone B will illuminate solid green.

**To answer multiple calls on the shared line:**

An incoming call arrives on the shared line when there is an active call on phone A’s line key 1. The LED indicators of the line key 2 on both phone A and phone B will fast flash green. You can answer the incoming call on either phone A or phone B. The LCD screen of phone A displays the information of the incoming call (e.g., “Incoming call: 4604 Yealink”).

![Incoming call screen](image)

**Note**

Make sure call waiting feature is enabled on phone A. For more information, refer to **Call Waiting** on page 92.

Do one of the following on phone A:

- Press the line key 2. Phone B stops ringing.

- Press the **Answer** soft key. Phone B stop ringing.

- Press to access the new call.
  
  Press or the **Answer** soft key. Phone B stop ringing.

  The incoming call is answered and the original call is placed on hold. The LED indicators of the line key 1 on phone A will slow flash green and phone B will slow flash red indicating that there is the held call on the line key 1. The LED indicators of
the line key 2 on phone A will illuminate solid green and phone B will illuminate solid red indicating that there is an active call on the line key 2.

You can also answer the call on phone B. Do one of the following on phone B:

- Press the line key 2. Phone A stop ringing.
- Press OK or the Answer soft key. Phone A stop ringing.

The LED indicators of the line key 2 on phone A will illuminate solid red and phone B will illuminate solid green indicating that there is an active call on the line key 2.

Meanwhile, The LED indicators of the line key 1 phone A will illuminate solid green and phone B will illuminate solid red indicating that there is an active call on the line key 1.

**Note**

If the number of incoming calls is greater than the configured line keys, the line keys will be used by sequence circulation.

**Placing a Call on Hold**

**To place a call on public hold:**

1. Press the Hold soft key on phone A when party A and party C are talking.

   ![Public Hold](image)

   The line key LEDs on phone A slow flash green and phone B slow flash red when the shared line call is placed on hold.

**To place a call on private hold:**

1. Press the PriHold soft key or private hold key on phone A when there is an active call on the shared line (You may need to press the More soft key to see the PriHold soft key).

   ![Private Hold](image)

   The line key LED slow flashes green on phone A when the shared line call is placed on private hold.

   The line key LED illuminates solid red on phone B when the shared line call is placed on private hold.
Retrieving a Held Call

To retrieve a call placed on public hold:

You can retrieve the public held call on either phone A or phone B.

To retrieve the call on phone A:

1. Press the line key with the slow flashing green LED indicator or the Resume soft key. The conversation between phone A and phone C is retrieved.

To retrieve the call on phone B:

Do one of the following:

- Press the line key with the slow flashing red LED indicator.
- Long press the desired line key. The Cancel, CallPull, NewCall and Retrieve soft keys appear on the LCD screen.

Press the Retrieve soft key to retrieve the call. The conversation is established between phone B and phone C, phone A disconnects the call. And the line key LED on phone A illuminates solid red and phone B illuminates solid green.

To retrieve a call placed on private hold:

The private held call can be only retrieved by the hold party (party A).

Do one of the following:

- Press the line key with the slow flashing green LED indicator.
- Press the Resume soft key on phone A.

Barging In an Active Call

To interrupt the active call on the shared line:

If phone A has only one active call, do the following:

1. Long press the desired line key on phone B.
The **Cancel**, **CallPull**, **NewCall** and **Barge In** soft keys appear on the LCD screen of phone B.

![Shared Calls](image)

2. Press the **Barge In** soft key to interrupt the active call of phone A.
   Party B will set up a conference call with the other parties in the active call.

3. Press the **Hold** or the **EndCall** soft key.
   - If any party in the conference call presses the **Hold** soft key, two-way voice can be heard between the remaining parties.
   - If party A or party B presses the **EndCall** soft key, the remaining parties are still connected. If the other party (not the shared line party) presses the **EndCall** soft key, the conference call is ended.

You can also press the line key with the solid red LED indicator on phone B to set up a conference call with the other parties in the active call.

If phone A has more than one call, do the following:

1. Long press the desired line key on phone B.
   The list of calls appears on the LCD screen of phone B.

![Shared Calls](image)

2. Press ▲ or ▼ to select the active call.
   The **Cancel**, **CallPull**, **NewCall** and **Barge In** soft keys appear when the active call is highlighted.

![Shared Calls](image)

3. Press the **Barge In** soft key to interrupt the active call of phone A.
   Party B may hear a warning tone and then set up a conference call with the other parties of the active call.

4. Press the **Hold** or the **EndCall** soft key.
   - If any party in the conference call presses the **Hold** soft key, two-way voice can be heard between the remaining parties.
   - If party A or party B presses the **EndCall** soft key, the remaining parties are still connected. If the other party (not the shared line party) presses the **EndCall** soft
key, the conference call is ended.

Call Pull

Call pull feature allows users to retrieve an existing call from another shared phone that is in active or hold status. For example, when there is a call between phone A and phone C, you can use call pull feature on phone B to retrieve this call from phone A. Then the call is established between phone B and phone C.

To retrieve a call from another shared phone:

If there is an active call between phone A and phone C, do the following:

1. Long press the desired line key on phone B.
   The Cancel, CallPull, NewCall and Barge In soft keys appear on the LCD screen of phone B.

2. Press the CallPull soft key.
   The active call has been retrieved from the phone A successfully.

If there is a held call between phone A and phone C, do the following:

1. Long press the desired line key on phone B.
   The Cancel, CallPull, NewCall and Retrieve soft keys appear on the LCD screen of phone B.

2. Press the CallPull soft key.
   The held call has been retrieved from the phone A successfully.

Bridged Line Appearance (BLA)

BLA allows users to share a SIP line on two or more IP phones. Users can monitor the specific extension (BLA number) for status changes on each IP phone. To use this feature, a BLA group should be pre-configured on the server and one of them is specified as a BLA number. BLA depends on support from a SIP server.
In the following figure, the first line is private and the second line is shared:

Any IP phone can be used to originate or receive calls on the bridged line. An incoming call to the BLA number can be presented to multiple phones in the group simultaneously. The incoming call can be answered on any IP phone of the group but not all.

**Configuring BLA Feature on the IP Phone**

You can share a BLA number on two or more phones. For example, phone A registers the account 14019833020 and assigns BLA number, phone B registers the account 10462190020 and assigns BLA number, phone C registers the account 14755608020. Phone A and phone B share the BLA number 14084588327.
To register account and configure BLA feature on phone A via web user interface:

1. Register the account 14019833020.

2. Click on Advanced, and then select Draft BLA from the pull-down list of Shared Line.

3. Enter the desired number in the BLA Number field.
4. Click **Confirm** to accept the change.

**To register account and configure BLA feature on phone B via web user interface:**

1. Register the account 10462190020.

2. Click on **Advanced**, and then select **Draft BLA** from the pull-down list of **Shared Line**.
3. Enter the desired number in the **BLA Number** field.

4. Click **Confirm** to accept the change.

### Using BLA Feature on the IP Phone

This section provides you with detailed information on using the SIP-T42G IP phone in a BLA scenario. In a BLA scenario, the status of the line key LED which associates with a bridged line will change. For more information on line key LED indicators, refer to **LED Instructions** on page 4.

You can do the following using the IP phone in a BLA scenario:

- Placing calls
- Answering calls
- Place a call on hold
- Retrieving a held call

### Placing Calls

You can have one call or multiple calls on the bridged line.

**To place a call on the bridged line:**

Do one of following:

- Enter the desired number using the keypad when the phone is idle. Press `ok`, `#`, or the **Send** soft key.

  The phone will dial the entered number.
- Press the line key when the phone is idle to enter the pre-dialing screen.
  Enter the desired number using the keypad and press [OK], [#], or the Send soft key.
  The phone will dial the entered number.

To place multiple calls on the bridged line:
You can have more than one call on the bridged line. To place a new call when there is an active call on the line key 1 of the phone A, do one of the following on the phone A:

- Press the Hold soft key. The original call is placed on hold.
  Press the NewCall soft key to enter the pre-dialing screen.
  Enter the desired number using the keypad.
  Press [OK], [#], or the Send soft key.
  Phone A will dial the entered number.

- Press the line key. The original call is placed on hold.
  Enter the desired number using the keypad.
  Press [OK], [#], or the Send soft key.
  Phone A will dial the entered number.

Answering Calls
When the phone C dials the BLA number “14084588327”, an incoming call will arrive on the bridged line. The phone A and phone B ring simultaneously and the LED indicators of the line key on both phone A and phone B will flash green. You can answer the incoming call on either phone A or phone B but not both.

Do one of the following on phone A or phone B:

- Press [OK], [ ] or the Answer soft key on phone A.
  Phone B stops ringing. The LED indicator of the line key on the phone A will illuminate solid green. At the meanwhile, the LED indicator of the line key on the phone B will illuminate solid red indicating that there is an active call on the phone A.

- Press [OK], [ ] or the Answer soft key on phone B.
  Phone A stops ringing. The LED indicator of the line key on the phone B will illuminate solid green. At the meanwhile, the LED indicator of the line key on the phone A will illuminate solid red indicating that there is an active call on the phone B.

Placing a Call on Hold

To place a call on hold:

1. Press the Hold soft key on phone A when party A and party C are talking.
The line key LEDs on phone A slow flash green and phone B slow flash red when the bridged line call is placed on hold.

**Retrieving a Held Call**

If there is a held call between phone A and phone C, you can retrieve a held call on either phone A or phone B.

**To retrieve the held call on phone A:**

1. Press the line key with the slow flashing green LED indicator or the Resume soft key on phone A.  
   The conversation between phone A and phone C is retrieved.

**To retrieve the held call on phone B:**

1. Press the line key with the slow flash red LED indicator on phone B.  
   The conversation is established between phone B and phone C, phone A disconnects the call.

**Messages**

**Short Message Service (SMS)**

You can send and receive text messages using the SIPT42G IP phone. New text messages can be indicated both acoustically and visually. When receiving a new text message, the phone will play a warning tone, and the LCD screen will prompt receiving new text messages with the number of waiting messages (example: 1 New Text Message(s)) and a flashing icon.

**Note**

When the phone receives a text message, the text message prompt window will pop up by default, if you want to disable the feature, contact your system administrator for more information.

You can store text messages in your phone’s Inbox, Sentbox, Outbox or Draftbox. Each of the boxes can store up to 100 text messages. If the number of the text messages in one box is more than 100, the phone will directly delete the oldest text message in the box.

**Note**

SMS is not available on all servers. Contact your system administrator for more information.
To read a text message:

1. Press **Menu -> Message -> Text Message -> Inbox.**

2. Select the desired message and then press the **View** soft key.

   **Note** If the phone prompts receiving new text messages, you can also press the **View** soft key to read the new messages directly.

To send a text message:

1. Press **Menu -> Message -> Text Message -> New Message.**
2. Compose the new text message. You can press the **abc** soft key to change the input mode.
3. Press the **Send** soft key after completing the content.
4. (Optional.) Press the ** or **, or the **Switch** soft key to select the desired account from the **From** field.
5. Enter the number you want to send the message to in the **To** field.
6. Press the **Send** soft key to send the message or the **Back** soft key to cancel.

Sending a text message is configurable via web user interface at the path **Features -> SMS.**

To reply a text message:

1. Press **Menu -> Message -> Text Message -> Inbox.**
2. Select the desired message and then press the **Reply** soft key.
3. Compose the new text message. You can press the **abc** soft key to change the input mode.
4. Press the **Send** soft key after completing the content.
5. Check the **From** and **To** fields, and then press the **Send** soft key.
To delete a text message:

1. Press Menu -> Message -> Text Message -> Inbox (Sentbox, Outbox or Draftbox).
2. Select the desired message and then press the Delete soft key.

3. Select Delete to delete the desired message.
   The LCD screen prompts “Delete Message?“.

4. Press the OK soft key to delete this message or the Cancel soft key to cancel.
   You can also delete all text messages by pressing the Delete soft key and then select 
   Delete All. For more information, refer to the above steps.

Note: You can also delete a specific message after retrieving by pressing the Delete soft key.

Voice Mail

You can leave voice mails for someone else using the Sipt4G IP phone. You can also 
listen to voice mails that are stored in a voice mailbox. When receiving a new voice mail, 
the phone will play a warning tone, and the power indicator LED will slow flash red. The 
LCD screen will prompt that the phone receives a new message and display an icon.

If the voice mail pop-up message box disappears, it won't pop up again unless the user 
receives a new voice mail or the user re-registers the account that has unread voice 
mail(s).

Note: Voice mail is not available on all servers.
You can configure the phone not to display the pop-up prompt, contact your system 
administrator for more information.
To leave a voice mail:

You can leave a voice mail for someone else when he/she is busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

To configure voice mail access codes via phone user interface:

2. Press the navigation keys to highlight the account which you want to set.
3. Press the 123 soft key to select the proper input mode and then enter the voice mail access code (e.g., *88).

4. Press the Save soft key to accept the change or the Back soft key to cancel.

Note: Voice mail access codes must be predefined on the system server. Contact your system administrator for the more information.

To listen to voice mails:

1. When the LCD screen prompts that the phone receives a new voice mail and the power indicator LED slow flashes red, you can press or the Connect soft key to dial out the voice mail access code.
2. Follow the voice prompt to listen to your voice mails.

Note: Before listening to voice mails, make sure the voice mail access code has been configured.

When all new voice mails are retrieved, the power indicator LED will go out.

To view the voice mail via phone user interface:

   The LCD screen displays the amount of new and old voice mails.

2. Select an account and then press the Connect soft key to listen to voice mails.
Message Waiting Indicator (MWI)

The SIP-T42G IP phone supports MWI feature when receiving a new voice message. If someone leaves you a voice mail, you will receive a message waiting indicator. MWI will be indicated in three ways: a warning tone, an indicator message (including a voice mail icon) on the LCD screen, and the power indicator LED slow flashes red. This will be cleared when you retrieve all voice mails or delete them.

The MWI service is unsolicited for some servers, so the SIP-T42G IP phone only handles the MWI messages sent from the server. But for other servers, the MWI service is solicited, so the SIP-T42G IP phone must enable subscription for MWI.

Note

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Subscribe for MWI</strong></td>
<td>Enable or disable a subscription for MWI service.</td>
</tr>
<tr>
<td><strong>MWI Subscription Period</strong></td>
<td>Period of MWI subscription. The IP phone sends a refresh SUBSCRIBE request before initial SUBSCRIBE expiration.</td>
</tr>
<tr>
<td><strong>Subscribe MWI To Voice Mail</strong></td>
<td>Enable or disable a subscription to the voice mail number for MWI service. To use this feature, you should also configure the voice mail number.</td>
</tr>
</tbody>
</table>

Note

The phone will send SUBSCRIBE messages for the MWI service to the account or the voice number MWI service depending on the server. Contact your system administrator for more information.

To configure subscribe for MWI via web user interface:

1. Click on **Account > Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Select **Enabled** from the pull-down list of **Subscribe for MWI**.
4. Enter the period time in the **MWI Subscription Period (Seconds)** field.

5. Click **Confirm** to accept the change.

The IP phone will subscribe to the account number for MWI service by default.

To enable subscribe MWI to voice mail via web user interface:

1. Click on **Account** > **Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Select **Enabled** from the pull-down list of **Subscribe for MWI**.
4. Select **Enabled** from the pull-down list of **Subscribe MWI To Voice Mail**.
5. Enter the desired voice mail number in the **Voice Mail** field.

6. Click **Confirm** to accept the change. The IP phone will subscribe to the voice mail number for MWI service using **Subscribe MWI to Voice Mail**.

**Note**

MWI subscription is configurable via web user interface only.
Troubleshooting

This chapter provides general troubleshooting information to help you solve the problems you might encounter when using your SIPT42G IP phone. If you require additional information or assistance with your new phone, contact your system administrator.

Why is the LCD screen blank?
- Ensure that the phone is properly plugged into a functional AC outlet.
- Ensure that the phone is plugged into a socket controlled by a switch that is on.
- If the phone is plugged into a power strip, try to plug it directly into a wall outlet instead.
- If the phone is powered from PoE, ensure that you use a PoE-compliant switch or hub.

Why does the phone display “Network unavailable”?
- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.

Why doesn’t the phone display time and date correctly?
Check if you have configured the phone to obtain the time and date from the SNTP server automatically. If the phone fails to connect to the SNTP server, you need to configure the time and date manually.

How can I find the basic information of the IP phone?
Press the OK key when the IP phone is idle to check the basic information of the IP phone, such as IP address and firmware version. For more basic information, refer to Phone Status on page 17.

How to obtain the MAC address of a phone when the phone is not powered on?
Three ways to obtain the MAC address of a phone:
- You can ask your supplier for the shipping information sheet which includes MAC addresses according to the corresponding PO (Purchase Order).
- You can find the MAC address on the label of the carton box.
- You can also find the MAC address from the phone’s bar code on the back of the phone.
Why can't I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the installation instructions, refer to Phone Installation on page 13.
- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether the dial tone is present for one of the audio modes.
  
  If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Why doesn't the phone ring?

Check the ringer volume on the phone. To adjust the ringer volume setting, press the Volume key when the phone is on-hook and idle. For more information, refer to Volume on page 28.

Why can't I receive calls?

- Check the SIP registration with your system administrator.
- Check that DND (Do Not Disturb) mode is deactivated on your phone. Refer to Do Not Disturb (DND) on page 81.
- Check that call forward is disabled on the phone. Refer to Call Forward on page 85.
- Check whether the caller number is stored in the blacklist directory. Refer to Blacklist on page 41.

Why is my handset not working?

Check that the handset cord is fully connected to both the handset jack on the phone and handset. Refer to Phone Installation on page 13.

Why is my headset not working?

- Check that the headset cord is fully connected to the headset jack on the phone. Refer to Phone Installation on page 13.
- Check that the headset mode is activated. Refer to Headset Use on page 47.
- Check that the headset volume is adjusted to an appropriate level. Refer to Volume on page 28.

What is the difference between user name, register name and display name?

Both user name and register name are defined by the server. A user name is used to identify the account, while a register name matched with a password is used for authentication if the server requires. Display name is the caller ID that will be displayed on the callee’s LCD screen. Server configuration may override the local configuration.
**Why does the phone play a tone when hold? How to disable it?**

When there is a call on hold, the phone will play a hold tone every 30 seconds. Play hold tone is enabled by default. Play hold tone and the interval of playing a hold tone are configurable via web user interface only.

**To configure the call hold tone and call hold tone delay via web user interface:**

1. Click on **Features -> General Information**.
2. Select **Enabled** or **Disabled** from the pull-down list of **Play Hold Tone**.
3. Enter the desired time in the **Play Hold Tone Delay** field.

4. Click **Confirm** to accept the change.

**Why can't I send a SMS to any other phone?**

SMS depends on support from a SIP server. Contact your system administrator for more information.

**How to change the user password?**

**To change the user password via web user interface:**

1. Click on **Security -> Password**.
2. Select **user** from the pull-down list of **User Type**.
3. Enter the new user password in the **New Password** field and **Confirm Password** field.

4. Click **Confirm** to accept the change.

You can also contact your system administrator for help.

**Note**

If logging into the web user interface of the phone with user credentials, you need to enter the current user password in the **Old Password** field.

User password is configurable via web user interface only.

**How to make a call using SRTP?**

You can enable SRTP to encrypt the audio stream(s) of phone calls. The parties participating in the call should enable SRTP. You can configure SRTP on per-line basis.

**To enable SRTP via web user interface:**

1. Click on **Account > Advanced**.
2. Select the desired account from the pull-down list of **Account**.
3. Select the desired type from the pull-down list of RTP Encryption (SRTP).

![Image]

4. Click Confirm to accept the change.

**Note**

SRTP is not available on all servers. Contact your system administrator for more information.

SRTP is configurable via web user interface only.

**How to reboot the phone?**

**To reboot the phone via web user interface:**

1. Click on Settings -> Upgrade.
2. Click Reboot to reboot the IP phone.

![Image]

**Note**

Any reboot of the phone may take a few minutes.
How to export PCAP trace?

We may need you to provide a PCAP trace to help analyze your problem.

To export a PCAP trace via web user interface:

1. Click on Settings -> Configuration.
2. Click Start to begin capturing signal traffic.
3. Recreate the error to be documented in the trace.
4. Click Stop to stop the capture.

5. Click Export to open file download window, and then save the file to your local system.

How to export system log?

We may need you to provide the phone configurations to help analyze your problem. In some instance, you may need to import configurations to your phone.

To export the system log to a local PC via web user interface:

1. Click on Settings -> Configuration.
2. Select 6 from the pull-down list of System Log Level.
   The default system log level is 3.
3. Click Confirm to accept the change.
4. Mark the Local radio box in the Export System Log field.
5. Click **Export** to open file download window, and then save the system log file to your local system.

You can also export the system log to a syslog server. Contact your system administrator for more information.

**Note**

It is recommended to reset the syslog level to 3 after exporting the system syslog.

**How to upgrade firmware?**

**To upgrade firmware via web user interface:**

1. Click on **Settings > Upgrade**.
2. Click **Browse** to locate the required firmware from your local system.

3. Click **Upgrade** to upgrade the firmware.
   
   The web user interface prompts “Firmware of the SIP Phone will be updated. It will take 5 minutes to complete. Please don't power off!”.

4. Click **OK** to confirm upgrading.
How to reset the phone?

Reset the phone to factory configurations after you have tried all troubleshooting suggestions but do not solve the problem. You need to note that all customized settings will be overwritten after reset.

To reset the phone via phone user interface:

1. Press **Menu** \(\rightarrow\) **Settings** \(\rightarrow\) **Advanced Settings** (default password: admin) \(\rightarrow\) **Reset to Factory**.
2. Press the **Enter** soft key.
   The LCD screen prompts the following warning:

   ![Warning Screen](image)

3. Press the **OK** soft key.
   The LCD screen prompts the following:

   ![Resetting Screen](image)

4. The LCD screen prompts the following:

   ![Welcome Screen](image)

The phone will be reset to factory settings successfully after startup.

**Note**

Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.
Regulatory Notices

Service Agreements
Contact your Yealink Authorized Reseller for information on service agreements applicable to your product.

Limitations of Liability
TO THE FULL EXTENT ALLOWED BY LAW, YEALINK EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF ITS PRODUCTS, EVEN IF YEALINK OR ITS AUTHORIZED RESELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT YEALINK’S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.

Safety Instructions
Save these instructions. Read these safety instructions before use!
The following basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and other personal injury.

⚠ General Requirements
- Before you install and use the device, read the safety instructions carefully and observe the situation during operation.
- During the process of storage, transportation, and operation, please always keep the device dry and clean.
- During the process of storage, transportation, and operation, please avoid collision and crash of the device.
- Please do not attempt to dismantle the device by yourself. In case of any discrepancy, please contact the appointed maintenance center for repair.
- Without prior written consent, no organization or individual is permitted to make any change to the structure or the safety design of the device. Yealink is under no circumstances liable to consequences or legal issues caused by such changes.
- Please refer to the relevant laws and statutes while using the device. Legal rights of others should also be respected as well.
Environmental Requirements

- Place the device at a well-ventilated place. Do not expose the device under direct sunlight.
- Keep the device dry and free of dust.
- Place the device on a stable and level platform.
- Please do not place heavy objects on the device in case of damage and deformation caused by the heavy load.
- Keep at least 10 cm between the device and the closest object for heat dissipation.
- Do not place the device on or near any inflammable or fire-vulnerable object, such as rubber-made materials.
- Keep the device away from any heat source or bare fire, such as a candle or an electric heater.
- Keep the device away from any household appliance with a strong magnetic field or electromagnetic field, such as a microwave oven or a refrigerator.

Operating Requirements

- Do not let a child operate the device without guidance.
- Do not let a child play with the device or any accessory in case of accidental swallowing.
- Please only use the accessories provided or authorized by the manufacturer.
- The power supply of the device must meet the requirements of the input voltage of the device. Please use the provided surge protection power socket only.
- Before plugging or unplugging any cable, make sure that your hands are completely dry.
- Do not spill liquid of any kind on the product or use the equipment near water, for example, near a bathtub, washbowl, kitchen sink, wet basement or near a swimming pool.
- Do not tread on, pull, or over-bend any cable in case of malfunction of the device.
- During a thunderstorm, stop using the device and disconnect it from the power supply. Unplug the power plug and the Asymmetric Digital Subscriber Line (ADSL) twisted pair (the radio frequency cable) to avoid lightning strike.
- If the device is left unused for a rather long time, disconnect it from the power supply and unplug the power plug.
- When there is smoke emitted from the device, or some abnormal noise or smell, disconnect the device from the power supply, and unplug the power plug immediately. Contact the specified maintenance center for repair.
- Do not insert any object into equipment slots that is not part of the product or auxiliary product.
- Before connecting a cable, connect the grounding cable of the device first. Do not disconnect the grounding cable until you have disconnected all other cables.

Cleaning Requirements
Before cleaning the device, stop using it and disconnect it from the power supply.

Use a piece of soft, dry and anti-static cloth to clean the device.

Keep the power plug clean and dry. Using a dirty or wet power plug may lead to electric shock or other perils.
